Secondary metabolite mapping identifies Scutellaria inhibitors of human lung cancer cells.  

Phytochemical informatics and virtual screening of herbs used in Chinese medicine.  

*In-silico* search for multi-target anti-inflammatories in Chinese herbs and formulas.  

Ethnobotanical survey and cytotoxicity testing of plants of South-western Nigeria used to treat cancer, with isolation of cytotoxic constituents from *Cajanus cajan* Millsp leaves.  

The application of chemometrics in standardisation and drug discovery from traditional medicine.  

Chemometrics and metabonomics in studies on traditional Chinese medicine.  

Phytochemical informatics and virtual screening of plants used in traditional Chinese medicine.  

*In-vitro* anti-fibrotic activities of herbal compounds and herbs.  

Screening of herbal constituents for aromatase inhibitory activity.  

Cytotoxic effects of compounds from *Iris tectorum* on human cancer cell lines.  

Phytochemical informatics and Traditional Chinese Medicine and therapeutic relevance.  

Comparison of rosmarinic acid content in commercial tinctures produced from fresh and dried lemon balm (*Melissa officinalis*).  

The sulphorhodamine (SRB) assay and other approaches to testing plant extracts and derived compounds for activities related to reputed anticancer activity.  

Antibacterial and antioxidant cassane diterpenoids from *Caesalpinia benthamiana*.  

Isolation and structure determination of triterpenes from *Iris tectorum*.  
Plants of Indian origin in drug discovery.

Virtual screening of Chinese herbs with *Random Forest*.

Phytochemical databases of Chinese herbal constituents and bioactive plant compounds with known target specificities.

*In-vitro* tests and ethnopharmacological investigations: Wound healing as an example.

A metabolomic strategy for the detection of the metabolic effects of chamomile (*Matricaria recutita* L) ingestion.

Prediction of anti-plasmodial activity of *Artemisia annua* extracts: application of $^1$H NMR spectroscopy and chemometrics.

Metabolomic strategy for the classification and quality control of phytomedicines: a case study of chamomile flower (*Matricaria recutita* L).

Multi-Component Metabolic Classification of Commercial Feverfew Preparations via High-Field $^1$H-NMR Spectroscopy and Chemometrics.

Application of chemometric techniques to the analysis of plant extracts.

Effects of *Buddleja globosa* leaf extract and its constituents relevant to wound healing.

Application of multivariate data analysis to ProteinChip™ data for the proteomic analysis of natural products.

Can proteomics be used to investigate potential modes of action of plant extracts on protein expression in SBR3 human dermal fibroblasts?
Determination of potential wound-healing effects of *Buddleja globosa* and *B davidii* leaves using an *in-vitro* human dermal fibroblast assay.

Plants as a source of new medicines.

J Gwynn and PJH, *Drug Discovery World*, 2000, **1**(1), 54-59.

PCT Patent Application number PCT/GB00/00428, 2000, granted as GB00/00428 in 2003, together with the following foreign counterparts:

- South Africa: 2001/6336, granted 29 January 2003,
- United States of America: 680690, granted 19 October 2004,
- People’s Republic of China: ZL00803631.4, granted 11 May 2005,
- Australia: 779104, granted 26 May 2005,
- Singapore: 82782, granted 31 May 2005,
- Europe: 00 902 767.3 1240, granted 29 July 2005,
- Taiwan: I238249, granted 21 August 2005,
- Hong Kong: 2108226.7, granted 20 September 2005

The occurrence of the anti-cancer diterpene taxol in *Podocarpus gracilior* Pilger (Podocarpaceae).

New and known taxoids from cell cultures of *Taxus chinensis*.

Cochliobolic acid, a novel metabolite produced by *Cochliobolus lunatus*, inhibits binding of TGF-α to the EGF receptor in a SPA assay.

Studies on the biosynthesis of taxol. The taxane carbon skeleton is not of mevalonoid origin.

Development of pharmaceutical companies based on plant products: suggested approaches.

*In-vitro* evaluation of the antimicrobial activities of *Enantia chlorantha* Oliv extractives.

Xenovulene A, a novel GABA-benzodiazepine receptor binding compound produced by *Acremonium strictum*.

Immunostimulants: maximising the health and efficiency of plants and animals through plant-derived biomolecules.

In-vitro evaluation of Enantia chlorantha constituents and derivatives for antiplasmodial and anticandidal activity.

Droplet countercurrent separation of bioactive constituents of Morinda lucida Benth root bark.

Yunnanxane and its homologue esters from cell cultures of Taxus chinensis var mairei.

New bioactive taxoids from cell cultures of Taxus baccata.

Plant cell culture and drug discovery.

Blue pigments of Penicillium herquei.

Some current trends in medicinal plant research.

The search for chemical diversity (1): Natural products.

Pyrrolizidine alkaloids in Senecio vulgaris L growing in Iceland.

Medicinal plants of Tunisia. The structure of periplocadiol, a new elemene-type sesquiterpene isolated from roots of *Periploca laevigata*.

Purification and partial characterization of a haemagglutinin from seeds of *Jatropha curcas* L.

Flavonoids and a heliangolide, niveusin-C, from *Melampodium camphoratum*.

Feverfew - its implications for future research.

The active principle of feverfew.

Feverfew. The latest research.

Pharmaceutical preparations containing sesquiterpene lactones.

E S Johnson, D M Hylands and P J H, 1986, United Kingdom Patent GB 2124486B.

Prophylactic treatment of migraine with feverfew.

Cucurbitacins from *Acanthosicyos horridus*.

The structure of vesuvianic acid from *Stereocaulon* species.

Efficacy of feverfew as a prophylactic treatment for migraine.

The efficacy of powdered dried leaves of *Tanacetum parthenium* (L) Schultz BIp in comparison with placebo as a prophylactic treatment for migraine.

*In-vitro* evaluation of the antimicrobial activity of lichen metabolites.

The isolation of methyl β-orsellinate from *Stereocaulon alpinum* and comments on the isolation of 4,6-dihydroxy-2-methoxy-3-methylacetophenone from *Stereocaulon* species.

Carbon-13 nmr spectroscopy of some *Strychnos* alkaloids: Part II.

Aromatic chemical shifts in ar-hydroxy- and -methoxy-substituted indole alkaloids, reference data and substituent-induced chemical shifts for ten different chromophoric groups.

Pharmaceutical preparations containing sesquiterpene lactones.

Traditional medicinal plants of Thailand. IV. 3-((2’,3’-diacetoxy-2’-methylbutryl)-cuauhtenone from Pluchea indica Less (Compositae).

New cucurbitacin derivatives from Bryonia dioica, Jacq.

Recent studies on feverfew.

Occurrence of longicaudatine, a new type of bis-indole base, and bisnor-C-alkaloid H in Strychnos species.

A revision of the structure of cucurbitacin S from Bryonia dioica.

Bryonoside and bryoside - new triterpene glycosides from Bryonia dioica.
P J H and J Kosugi, Phytochemistry, 1982, 21(6), 1379-1384.

Gas-liquid chromatographic separation of the cucurbitacins.
P J H and W Silapa-Archa, Mahidol University Journal of Natural Products, 1980, 7(2), 41-44.

Bryocoumaric acid, a new triterpene ester from Bryonia dioica.

New tertiary alkaloids of Strychnos decussata.

Alkaloids and glycosides from Centaurium spicatum.

3α-Hydroxymultiflora-7,9(11)-dien-29α-oic acid, a new triterpene from Bryonia dioica.
P J H and M T Oskui, Phytochemistry, 1979, 18(11), 1843-1845.

Seasonal sterol variations in Ecballium elaterium.
P J H and M T Oskui, Planta Medica, 1979, 37(1), 37-44.

The structure of elasterol from Ecballium elaterium.
P J H and M T Oskui, Phytochemistry, 1979, 18(9), 1543-1545.

Maragenins I, II and III, new pentacyclic triterpenes from Marah macrocarpus.

Protostrychnine, a new alkaloid from Strychnos nux-vomica.

Chemical studies on Centaurium spicatum - the structures of “spicatine” and “kantaurin”.

Saponins from Cyclamen hederifolium and C graecum.
Carbon-13 nmr spectroscopy of some *Strychnos* alkaloids.

Cardiotonic glycosides from the latex of *Naucleopsis mello-barretoi*, a dart poison plant from north-west Brazil.

Contributed chapters on the chemistry of plants in “*Encyclopaedia of Herbs and Herbalism*”.

Unsaturated steroids. Part 5. Synthesis of 4α-methyl-5α-cholest-8(9)-en-3β-ol.

Cucurbitacin S, a new cucurbitacin from *Bryonia dioica*.

Alkaloids of *Tylophora* species from Sri Lanka.
