Special Awards

- Geography labs have been making their own air quality monitors and are working with SMSS to go into local schools to build and walk around their local area to map clean air routes and devise clean air walking route for pupils and their parents/guardians.

- Maughan library champions planted 202 trees in the Maughan library garden as part of the Mayors London Tree Planting Weekend (1 & 2 December).
- King's Policy Institute sustainability champion, Rebecca Brown, established the first Universities Against Modern Slavery Alliance (UAMSA) conference in March.
- King's Food & Venues promoted and carried out a beach clean on the banks of the Thames – copious of cable ties and fish soy sauce packets were found!
- Science Gallery London grafted cacti in their 'SPARE PARTS' exhibition – the remaining cacti have now been donated to KCLSU to find a new home in the student common area.

King's Sustainability achievements this year include:

- 37% carbon reduction achieved (by July 2018), keeping us on track to achieve the 43% carbon reduction goal by 2020.
- Improving waste recycling rates to an overall recycling rate of 62%
- Growth in Sustainability Champions teams was 35% and the number of champions grew by 44%
- 26 events held by staff and students champions in [Sustainability Week](#)
- King's ranked 5th in the world for social impact in [THE rankings](#).
