# Engineering is transforming modern healthcare!

# Become a Healthcare Technologist

## Key Benefits

---

- The course is **accredited by The Institute of Engineering and Technology**.
- Accreditation entitles the degree holder to **gain Chartered Engineer status** when presented with an accredited undergraduate degree.
- Will fully equip students to take advantage of exciting new developments and maximise their potential to **transform healthcare**.
- Opportunity for all students to **link with clinical, industrial and radiopharmaceutical partners**.
- Allow students to **develop advanced technical competencies** that have clinical and commercial relevance.
- On completion of their studies, students will be well-prepared to take control of their own career trajectories and begin to **lead new developments in these technological advances**.
- Unrivalled location in the **centre of London**.
