TPP
The Francis Crick Institute is a biomedical discovery institute dedicated to understanding the scientific mechanisms of living things. Its work is helping to understand why disease develops and to find new ways to treat, diagnose and prevent illnesses such as cancer, heart disease, stroke, infections, and neurodegenerative diseases.

The Francis Crick Institute was founded by six of the UK’s most successful scientific and academic organisations - the Medical Research Council (MRC), Cancer Research UK (CRUK), the Wellcome Trust, UCL (University College London), Imperial College London and King’s College London.
Eager to move on up in your career?

Naturejobs is the global jobs board and career resource for scientists. We can help you throughout your job search and your career:

Find a job
Help employers to find you
Meet employers in person
View science careers advice
Ask us questions

naturejobs.com
AXON partners with global pharmaceutical and device companies to develop strategic communication plans and deliver creative and innovative solutions that can make a real difference to the lives of patients and their loved ones.

We create science-based, engaging medical communications and impactful public relations campaigns. We are committed to achieving meaningful results in an industry that impacts the lives of patients.

Does this speak to your interests or expertise? We at AXON are always keen to hear from passionate, bright individuals who might fit into our collaborative and creative London-based team (one of the UK’s Top 10 Best Workplaces in 2017*).

Ashfield Health

B11
careersuk.ashfieldhealthcare.com

Ashfield are looking for bright and ambitious graduates who are eager to join the pharmaceutical industry.

As a graduate Medical Sales Representative you will be required to be highly motivated to build partnerships with healthcare professionals, demonstrating the value your products bring to them and their patients in order to reach sales targets, (whilst working in a specific geographical location). As a Medical Sales Representative you will be the vital link between pharmaceutical companies and healthcare professionals.

The position offers an excellent staring salary, company car, laptop, pension, healthcare scheme and unrivalled training. A science degree is desirable but not essential. If you are willing to relocate we are particularly keen to hear from you.

Have you got what it takes?

Key responsibilities:
- Develop an understanding of the relevant product and diseases area to facilitate detailed discussions with medical professionals.
- Build and maintain relationships with healthcare professionals in a specific geographical location.
- Keep up to date with any changes to the NHS.
- Plan and organise your own diary to achieve sales and activity targets set by the company.
- Ensure all relative administration tasks are kept up to date within agreed timelines.
- Exceptional communication skills written and verbal.
- Initiate, organise and carry out sales presentations at the frequency and attendance rate as set by the company.
- Monitor and utilise all relevant promotional literature as part of the sales process.
- Liaise with all relevant personnel within Ashfield and the client company.
- Adhere to the ABPI code of conduct at all times Maintain company property to the highest standard.
- Act at all times within the terms and conditions of your Ashfield contract of employment.
- Possess a full valid UK driving licence.
- Have the right to work in the UK.

Other desirable attributes include:
- Some work experience in a sales or customer facing environment.
- Evidence of achievement outside of your academic career.
- Good rapport, planning and organising.
- A real desire to challenge yourself and succeed

Astex Pharmaceuticals

A11
astx.com/our-people-and-culture/career-opportunities/

Astex is a leader in innovative drug discovery and development, committed to the fight against cancer and diseases of the central nervous system (CNS).

We are a member of one of Japan’s leading pharmaceutical companies, the Otsuka group, and therefore benefit from the resources and commitment of a global pharmaceutical company.

- Robust proprietary oncology product portfolio with multiple drugs in mid-late stage clinical development worldwide.
- Developing a CNS product portfolio of novel targeted therapeutics for defined neurodegenerative disease populations.
• Highly collaborative, science-driven culture that is enhanced by an “open innovation” approach with a range of strategic relationships with leading academic research institutes, research charities and via partnerships with other companies.

AstraZeneca
A12
careers.astrazeneca.com/students/programmes/imed-e

There are many career paths and programmes available to you, whatever your level of study, in locations across the globe. Begin channelling your passion with us.

Undergraduate Opportunities
• MedImmune 12 Month Industrial Placements (UK)
• Pharmaceutical Technology & Development Summer Placements (UK)
• Pharmaceutical Technology & Development 12 month Industrial Placement (UK)
• Leaders in Finance Tomorrow (U.S.)
• Innovative Medicine and Early Development Undergraduate Industrial Student Programme (UK and Sweden)
• Graduate and Masters Opportunities
• Biometrics and Information Sciences (B&I) Graduate Programme (UK, Sweden and Poland)
• IT Leadership Programme (UK, U.S., Sweden, India, Japan and China)
• Pharmaceutical Technology & Development Programme (UK and Sweden)
• Operations Global Graduate Associates Programme (UK, U.S., Sweden, China Australia)

Autolus Limited
B1
www.autolus.com/careers
Autolus is an exciting, rapidly expanding, ambitious and well financed biotechnology company seeking to develop and commercialise the next generation of engineered T-cell therapies for haematological and solid tumours. We intend to be at the forefront of a revolution in medicine in which life-threatening diseases are treated with a patient’s own cells, modified outside the body and then returned to the patient to more effectively combat cancer. Our team are passionate in the pursuit of excellence and in pushing the boundaries of cancer therapy to deliver life-changing treatments to patients. At Autolus, you will enjoy a flexible, diverse and dynamic working environment which fosters creativity, leadership and teamwork.

AXON
A13
www.axon-com.com/careers
At AXON, we partner with a range of clients from pharmaceutical, biotech, medical device, animal health and functional foods companies, delivering strategic counsel and proactively identifying and overcoming any challenges as needed to ensure our clients’ success. We are committed to achieving meaningful results in an industry that impacts the lives of patients.

We simplify complex information to improve outcomes in healthcare. Our aim is to drive change in the knowledge, skills, attitudes and behaviours of healthcare professionals, addressing unmet medical needs and ultimately helping improve outcomes for patients.
We support the development of strategically and scientifically robust medical communications, including expert meetings, congress and symposia activities, medical writing and publications.

We enjoy bringing together passionate people with the right expertise to develop innovative solutions. If you are interested in joining our collaborative, creative and inspiring London-based team then visit us online and get in touch on hr-ldn@axon-com.com reference ‘Careers’.

Cancer Research UK
B13
www.cancerresearchuk.org/about-us/charity-jobs/graduates-and-interns

Are you a bright, forward-thinking graduate who can help us beat cancer sooner?

At Cancer Research UK (CRUK), we are collectively leading pioneering life-saving research in the fight against all cancers. Innovative science, dynamic business capabilities and bold marketing strategies combine in a world class organisation pioneering scientific excellence. We have an ambitious goal: to accelerate progress in cancer research and see 3/4 of people beat cancer in the next 20 years.

Our graduate opportunities are truly unique. With a commercial strength equivalent to a FTSE 350 company, we are Number 2 in the Guardian UK 300 and are one of the UK’s most widely recognised brands. We reach and engage millions of supporters through bold marketing strategies, and are constantly evolving, adapting and implementing the best strategies and technologies to beat cancer sooner.

If you’re a graduate full of fresh ideas and with a history of achievement, both academic and extra-curricular, we have 6 streams for you to choose from, each designed to give you a solid foundation for your career. This year we are recruiting for graduates in:
- Policy Information and Communications
- Fundraising and Marketing
- Technology
- Scientific Strategy and Funding
- Finance
- HR

You will have a passion for CRUK and an understanding of the work we do to drive our ambitions. You won’t be afraid to think big and try new ideas and you will always be looking to learn from the people around you. As a solutions focussed graduate, you will be able to show a consistently strong work ethic and have the ability to apply your experience to the work we do. As one of our trainees, you’ll join us at our London office where you’ll be exposed to 4 different teams across your area of interest, spending 6 months in each – with our Finance stream being 3 one year placements.

You’ll establish an in-depth understanding of the organisation whilst developing all the skills and experience to help you thrive in your future career. To make sure you get the most out of your scheme, we’ll give you plenty of training, development and support, including a dedicated mentor and a development plan that’s tailored to meet your personal needs.

Every day we achieve extraordinary things by being sharp, brave and united in our work. If you think you can help us beat cancer sooner, please visit our website today.
The Celgene UK and Ireland Internship Programme aims to identify self motivated, high calibre individuals who are keen to gain extensive work experience within a dynamic global organisation.

To ensure each intern is able to play to their strengths while developing new skills and knowledge, they each have a designated mentor who supports them and pre plans projects for them in advance. One vital thing we ensure when taking on any intern is that they’re involved in high impact, ‘real’ business projects. Our mentors are carefully selected from our internal talent pool so we’re confident that our interns are trained by some of the most inspiring and dynamic individuals in the business. This partnership means they both get the most from their experience.

Costello Medical Consulting
A4
www.costellomedical.com

Costello Medical is a vibrant, welcoming and rapidly growing medical communications and health economics agency based in Cambridge, London and Singapore. Our specialist teams work with a wide range of clients, including the world’s largest pharmaceutical and medical device companies, on projects in the areas of health technology assessment and health economics, medical affairs, market access, statistics, evidence development and publications.

We provide strategic advice and technical expertise to our clients, preparing high-quality written and visual scientific documents that communicate the clinical and economic benefits of pharmaceutical products to various key stakeholders in the healthcare sector. Our work has a direct and measurable impact on the successful launch of novel therapies across a wide range of disease areas.

GlaxoSmithKline
B15
www.gsk.com/en-gb/careers/

We are a science-led global healthcare company that researches and develops innovative Pharmaceuticals, Vaccines and Consumer Healthcare products. Our products are used by millions of people around the world, helping them to do more, feel better and live longer.

We have three primary areas of business in pharmaceuticals, vaccines and consumer healthcare. Our commercial success depends on creating innovative new products and making these accessible to as many people who need them as possible. By achieving this, we will be able to grow our business and provide benefits to patients, consumers, society, our employees and our shareholders.

Research is vitally important to the success of our business – in 2014 we spent £3.5 in our search to develop new medicines, vaccines and innovating consumer products. We are one of the few healthcare companies researching medicines and vaccines for the World Health Organisation’s three priority diseases - HIV/AIDS, tuberculosis and malaria.
We have a significant global commercial presence in more than 150 markets, a network of 84 manufacturing sites, in 36 countries and large R&D centres in the UK, USA, Belgium and China. Since 2008 we have reshaped our global footprint to improve access to high growth potential markets including those in Asia Pacific, Latin America and Japan.

Graduates into Health (formerly NHS Internship Scheme)
A7
www.nhsgraduates.co.uk

Who we are:
We currently run a Graduates into Health Programme which recruits for all business function roles within the NHS, placing graduates into paid roles at a minimum of £16,800 plus Inner or Outer London Wage (in NHS terms Bands 3 onwards).

What are the benefits to students:
Experience graduate level employment within the NHS in business function roles
Streamlined recruitment service for students/graduates into the NHS
Improving employability by gaining valuable experience
Develop a network within the NHS and meeting a wide range of useful contacts
Gain ‘behind the scenes’ insight into the health and social care sector
Paid roles at the minimum of £16,800 per annum plus inner/outer London Weighting

FAQ’s
I am an International Student, can I still apply?
If you are currently a student with a student visa and the right to work in the UK then YES! Unfortunately if you have graduated and no longer have a visa you will not be eligible for this programme as our government ensures we recruit from UK and EU residents in the first instance.

Do you do clinical roles?
Unfortunately no! Our programme is based on only the business function roles in the NHS.

Do you do short term placements?
Yes! Our roles vary from short term contracts to 3 months, 1 year and even sandwich placements. How do I find out more or apply?
We are currently building our website- for now, please email palvasha.zia@nhs.net who will add you to our mailing list where you will be kept up to date with all of our vacancies and information on how to apply!

Havas Lynx
B5
www.havaslynx.com

Havas Lynx is a global communications group - with offices in Manchester, London and New York. The majority of the work we do is within the healthcare and wellness sector. Across our UK offices we have a team of 260 people who produce global marketing campaigns that enables us to enhance people’s lives whether that is by helping patients to understand their treatment options, providing support to carers or by helping Healthcare Professionals, and others in healthcare systems to make appropriate treatment decisions.
Would you like to use your life science knowledge to help solve some of the toughest commercial challenges? Want to apply your subject expertise within the business environment?...

L.E.K. Consulting is a global strategy consulting firm that addresses the most complex commercial issues for some of the world’s most successful businesses.

Clients come to us time and again because we have proven to be an insightful expert and a trusted partner. We are uncompromising in our approach to helping them consistently make better decisions, deliver improved business performance and create greater shareholder returns.

Our teams combine our core capabilities of research, benchmarking, modelling, analysis and strategy development to create game-changing insights and practical solutions that deliver real impact.

We are currently recruiting for Associate positions and Life Science Specialists to work within our Life Science Practice. The role will enable you to specialise in Consulting across our varied Life Science industries.

Lifescience Dynamics Ltd

Our people are working for the world’s leading pharmaceutical, biotechnology, medical device and diagnostics companies on their toughest strategic and operational questions.

Winner of the prestigious Queens Award for Enterprise 2016 and ranking in Vault.com’s 25 Best Consulting Companies to work for - Lifescience Dynamics is a decision support firm providing the world’s top 20 largest life sciences companies (pharmaceutical, biotechnology, diagnostics and medical devices) with strategic insight and foresight to improve their assumptions, enabling them to make better decisions.

We are looking for exceptional talent to join our entrepreneurial, friendly and family-oriented company headquartered in London with offices in Boston and San Francisco. We have been growing consistently since 2009 - we grew our revenue by nearly 100% both in 2015 and in 2016, and we smashed our 2016 stretched target. Lifescience Dynamics works across three practice areas: Market Research, Competitive Intelligence, and Market Access, Pricing & Reimbursement. The company’s success is attributed to its multinational team who work in a collaborative and nurturing environment, where they can develop their skills and advance their careers.

Lucid Group

We are a group of medical education award winning agencies.

The group was established in 2007 and has experienced industry leading growth every year since. This has been driven by the amazing relationships we build with our clients. It is also driven by the passion, scientific curiosity and entrepreneurial spirit of our team.

At Lucid, the focus of our experienced team is our commitment to deliver excellent value to our clients and to our expert partners.
We strive to be flexible and work hard to meet the needs of our clients; we are not restricted by internal processes or a focus on profit margins. We are industry-leading thinkers when it comes to education. We utilise the latest academic thinking on the psychology of behaviour change and education interventions to build tailor-made programmes. We are driven in everything we do by our passion for advancing clinical practice and improving patient outcomes.

MRC London Institute of Medical Sciences
B10
lms.mrc.ac.uk

Each year we have eight studentships available for our 3.5 year PhD programme commencing each October. These studentships provide a generous stipend (currently £19,000), tuition fees and bench fees for 3.5 years. This programme is designed for students who have a clear idea of the field in which they wish to work and who have solid laboratory or research experience. It provides the opportunity to undertake a PhD project that will make a novel contribution to scientific knowledge and understanding. We are seeking science graduates who are excited by scientific research, curiosity driven, and tenacious to join our international PhD programme. Research projects taking innovative experimental and computational approaches to advance the understanding of biology and its application to medicine are available across our 3 scientific sections: Epigenetics, Genes & Metabolism, and Integrative Biology. Studentships are available for UK and eligible EU graduates, and exceptional graduates from other overseas countries.

National School of Healthcare Science
B3
www.healthcareers.nhs.uk/stp

The Scientist Training Programme is an innovative three year, fixed term programme of work based and academic learning, leading to an accredited university master’s degree and registration as a clinical scientist. The training posts offer excellent broad based clinical scientific training, across a range of rotations in different clinical scientific specialties before specialising in one area in the latter part of the training. Further information on the programme can be found on the school website: http://www.nshcs.hee.nhs.uk/join-programme/nhs-scientist-training-programme’

Naturejobs
A15
www.naturejobs.com

NHS Graduate Management Training Scheme

By joining the multi-award winning NHS Graduate Management Training Scheme, you will be developing the skills and confidence you need to lead our organisation through its transformation into an ever more efficient, successful and professional health care service. You’ll enjoy mentoring, support and first class training from some of the most brilliant minds in the NHS.

Novo Nordisk

At Novo Nordisk, we are driving change to defeat diabetes and other serious chronic conditions.
Novo Nordisk is a global healthcare company with more than 90 years of innovation and leadership in diabetes care. This heritage has given us experience and capabilities that also enable us to help people defeat other serious chronic conditions: haemophilia, growth disorders and obesity.
Headquartered in Denmark, Novo Nordisk employs approximately 42,000 people in 77 countries and markets its products in more than 165 countries.
Novo Nordisk hires continually throughout the year on a global level to its graduate programme, internships and normal full-time positions. Graduate programme applications open towards to end of each year. Internships are advertised in the spring and Autumn.
Nucleus Global
A8
www.nucleus-global.com
Nucleus Global is a group of medical communications agencies that provides full in-house consulting and communications services to the pharmaceutical and biotechnology industries, and to healthcare professionals.

The Nucleus Global Group of companies was founded in 1986. Since then we have grown to be the world’s largest independent full-service medical communications group. This growth is a result of a focus on creating innovative and impactful medical communications, educational programmes, and consistently delivering outstanding quality to our clients. Over the past two decades the vast majority of our growth has come from client referrals based on our performance track record and our trusted client relationships.

As well as a number of full-service medical communications agencies, Nucleus Global also has its own continuing and independent medical education (CME/IME) companies.

We have significant expertise in providing strategic and tactical support across entire product lifecycles, from preclinical development through pre-launch and launch to post-marketing development, enhanced through building and maintaining good relationships with our clients. We also provide strategic and market access consultancy to ensure we can service specialized health economic communications, value pricing and reimbursement strategies and portfolio planning.

Our current clients include the top 20 pharmaceutical companies as well as smaller pharmaceutical and biotechnology companies, academic institutes and societies, and not-for-profit medical organisations.

For the majority of our clients we support multiple brands and have strong relationships that span many years; and in some cases, decades.

Nucleus Global combines the very best of scientific knowledge, pharmaceutical marketing experience, creativity and technological innovation.

Procter & Gamble
A16
uki.pgcareers.com/
What does it take to come up with some of the world’s most well-known brands? Well, a whole lot of science, to start. Some of the best researchers in the world go to work making the products just right for the billions of consumers who use names like Pampers, Tide, Pantene and Gillette every day. We’re talking cutting-edge technology, “hands-on” labs and pilot plants, 41,000+ active patents and a team full of inventors.

From researchers to scientists and more, we’re looking to hire some serious talent for our R&D team. Every year we hire via internships for those in the penultimate year or study for a Masters and via a PhD programme for those in any year of their PhD. The main disciplines we look for are chemistry, life sciences, chemical engineering and mechanical engineering.

Interns will be invited to work at a P&G site for the summer, or longer if they prefer and PhDs will attend an all expenses paid seminar at one of our European technical centres where they will understand more about the work we do and how PhDs are a core part of our talent needs.
QuintilesIMS Consulting Services

A5
www.quintilesims.com
QuintilesIMS is a leading integrated information and technology-enabled healthcare service provider worldwide, dedicated to helping its clients improve their clinical, scientific and commercial results. Formed through the merger of Quintiles and IMS Health, QuintilesIMS’s approximately 50,000 employees conduct operations in more than 100 countries.
Companies seeking to improve real-world patient outcomes and enhanced clinical trial outsourcing through treatment innovations, care provision and access can leverage QuintilesIMS’s broad range of healthcare information, technology and service solutions to drive new insights and approaches. QuintilesIMS provides solutions that span clinical to commercial bringing clients a unique opportunity to realize the full potential of innovations and advance healthcare outcomes.
As a global leader in protecting individual patient privacy, QuintilesIMS uses healthcare data to deliver critical, real-world disease and treatment insights. Through a wide variety of privacy-enhancing technologies and safeguards, QuintilesIMS protects individual privacy while managing information to drive healthcare forward. These insights and execution capabilities help biotech, medical device, and pharmaceutical companies, medical researchers, government agencies, payers and other healthcare stakeholders in the development and approval of new therapies, identify unmet treatment needs and understand the safety, effectiveness and value of pharmaceutical products in improving overall health outcomes.

Roche Diagnostics

B6
www.roche.com/careers/country/unitedkingdom.htm
At Roche, we believe in doing now, what patients need next. So we follow where the science leads. We focus on today and look beyond tomorrow to tackle the world’s most formidable healthcare challenges. We focus on developing innovative medicines and diagnostic tests that help patients live longer, better lives. We strive to address unmet medical needs through excellence in science. We combine our strengths in pharmaceuticals and diagnostics to better fit treatments to patients.
Our people make our business; We are a force of over 90,000 people working together across more than 100 countries. We are committed to constantly strengthening and maintaining an excellent workplace where every person feels valued and respected and can grow to his or her full potential. They discover, develop and manufacture our products and ensure they reach the patients who need them. We believe that the key to our success lies in our ability to attract, retain and motivate a highly skilled and diverse workforce.
Roche UK is one of the key global hubs in Roche Group’s global network. Globally Roche spend £6.6bn in Research and Development, making Roche the largest Biotech investor in R&D, the 5th largest R&D investor globally across all industries. £483m was invested in the UK setting enabling Roche to treat 52,600 patients in the UK in 2015.
Roche UK is looking for a positive and enthusiastic placement student who is keen to gain exposure within a commercial business environment. The successful applicant will spend a year supporting the Training Excellence function in delivering industry leading Learning and Development.
Roland Berger

www.join.rolandberger.com

Roland Berger is one of the world’s leading strategy consultancies. Now with 50 years of continuous growth behind us and 2,400 employees working in 34 countries, we are one of the leading players in global top-management consulting and have successful operations in all major international markets.

We are currently looking for Junior Consultants to join our London office in 2018. Typically, you will be exposed to a wide range of projects, from which you will gain a broad range of industrial and functional experience. You will benefit from a comprehensive training scheme, with a two-week induction course for new entrants that includes training in consulting skills, an introduction to our corporate culture and a great opportunity to network, as well as exposure to many different industries.

Our London office has a challenging, friendly and supportive working environment with a strong international element in our work. People who fit most easily with our culture are bright, proactive, hardworking, unpretentious, confident and personable. Candidates should be on target for a first or upper second class result in their undergraduate degree.

Simmons & Simmons

Scratch the surface of Simmons & Simmons and you’ll discover a leading law firm of over 1,600 colleagues, offering expert legal advice across Europe, the Middle East and Asia. We operate across four key sectors and a range of services to help clients navigate all kinds of legal challenges, from buying and selling national chain stores to developing new fleets of aircraft. We work in the areas that matter the most to everyone’s future, from Life Sciences to Technology, Media and Telecommunications. So whatever you do, wherever you go, you’ll see developments we’ve been involved in. All you need to do is look, and you’ll uncover the world of law.

We offer two-year training contracts in London and Bristol. As well as moving through four six-month seats across our sectors, you’ll also benefit from the Compass programme: our unique and progressive trainee skills academy that offers a combination of practical learning, mentoring and online tools. Our teams teach you about the world of law, and you’ll find your niche in the process, qualifying into your choice of practice area.

Get right to the heart of life as a trainee lawyer on our vacation schemes:

• Winter (London): one week scheme aimed specifically at final year students and graduates of all disciplines. Applications open 01 October 2017.

• Spring (London): two-day workshop for first year students of all disciplines, and penultimate year non-law students. Applications open. Applications open 15 January 2018.

• Summer (London): two-week scheme open to penultimate and final year students and graduates of all disciplines. Applications open 15 October 2017.
• Summer (Bristol): one-week scheme open to penultimate year law students and final year students and graduates of all disciplines. Applications open 15 October 2017. A series of open days, run throughout the year, are also available in London and Bristol to all students and graduates.

**Springer Nature**

**B2**

Nature Research is a portfolio of high-quality products and services across the life, physical, chemical and applied sciences – including journals, databases and researcher services – dedicated to serving the scientific community.

Nature is the leading, international weekly journal of science. Nature Research also publishes a range of Nature branded subscription journals, the leading open access multidisciplinary journal Nature Communications, other open access journals including Scientific Reports, and a range of Nature Partner Journals published in partnership with institutions and societies. Together, these journals publish some of the world’s most significant scientific discoveries.

Online, nature.com provides over nine million unique visitors per month with Nature Research content, including news and comment from Nature, and the leading scientific jobs board, Naturejobs. Nature Research also offers a range of researcher services, including online and in-person training and expert language and editing services. For more information, visit nature.com. Nature Research is part of Springer Nature.

**Teach First**

**B12**

[graduates.teachfirst.org.uk/](http://graduates.teachfirst.org.uk/)

We are an increasingly influential education charity, engaging the UK’s brightest talent to fight a serious social problem – educational inequality. The link between how well you do in life and how much your family earns is stronger in the UK than almost anywhere in the developed world. It doesn’t have to be this way. Young people need leaders – exceptional people who can bring out the best in them. The Teach First Leadership Development Programme (LDP) will help you become such a leader.

Our two-year LDP combines teacher training and a fully-funded Postgraduate Diploma in Education (PGDE) with one-to-one coaching to develop your personal and leadership qualities. If you can inspire in the classroom, you can bring resilience, efficiency and imagination to any working environment, no matter where your career takes you.

Apply now for the 2018 cohort and join thousands of others committed to ending educational inequality.
NOW RECRUITING
EDITORIAL AND
PUBLISHING ROLES

Springer Nature advances discovery by publishing robust and insightful research, supporting the development of new areas of knowledge and making ideas and information accessible around the world.

Tessella Ltd
A14
jobs.tessella.com
Tessella is the Analytics World Class Center of the Altran Group. We are innovative scientists and engineers who enjoy solving the real-world technical challenges faced by industry-leading companies at the forefront of science and technology. Using a combination of deep domain knowledge and technical expertise, including data science, analytics and software engineering, we work with our clients to find new ways to unlock the value held within their data, enabling them to make better-informed business decisions.

We are looking for enthusiastic science, mathematics and engineering graduates and postgraduates to join us. You will have the opportunity to apply the knowledge you have gained during your studies and use a range of skills to create, develop and deliver solutions that truly make a difference in the world. You will be expected to quickly learn new domains and technologies and apply innovative thinking and transferable skills to solve new challenges.

The Wellcome Trust
A18
www.wellcome.ac.uk/jobs
Wellcome exists to improve health for everyone by helping great ideas to thrive. Wellcome is a global charitable foundation, both politically and financially independent. We support scientists and researchers, take on big problems, fuel imaginations and spark debate.

We are looking for recent graduates that want to make a difference in global health. Our two-year graduate development programme allows graduates to try out four different jobs for six months at a time. This could involve helping to develop funding schemes, researching investment opportunities or identifying new ways to engage the public with our work. No matter which rotations you choose, you’ll be a valued member of the team, with support from mentors, line managers and peers, on-the-job and formal training opportunities, real responsibilities, and the knowledge that you’re contributing to our overall purpose.

TPP
