Institute of Psychiatry, Psychology and Neuroscience

Results of the College's Undergraduate and Postgraduate Boards of Examiners held between 2 January 2017 and 1 August 2017

Doctor in Clinical Psychology

*Development of two novel tests for Conversion Disorder: A normative study with a healthy control sample*  
Egberdina-Jozefa Van Der Hulst

Doctor of Medicine (Research)

*Medical Humanities Health*  
*Meaning and Meaninglessness in Neuropsychiatry*  
Norman Alan Poole

*Psychiatry*  
*Evaluating the criminal justice mental health pathway.*  
Andrew Forrester

Doctor of Philosophy

*Academic Psychology*  
*Parental participation in Speech & Language Therapy (SLT) treatments in young children with Speech, Language and Communication Needs (SLCN): levels, predictors and relations with child outcome.*  
Penelope Williams

*Biological Psychiatry*  
*Biomarkers of inflammation as predictors of treatment response in depression*  
Rebecca Clare Strawbridge

*Child and Adolescent Psychology*  
*Comparison of brain function and structure between paediatric OCD and ADHD patients*  
Luke Joseph Norman

*Clinical Neuroscience*  
*Expanding the phenotype and genetic spectrum of myoclonic astatic epilepsy*  
Shan Tang

*Clinical Psychology*  
*Development and evaluation of a self-confidence webinar for depression in the workplace*  
Wan Mohd Azam Bin Wan Mohd Yunus

*Developmental Neuroscience*  
*Exploring the mechanisms of synaptotrophic arbor growth in Drosophila*  
William Duncan Constance

*Epidemiological Psychiatry*  
*Addiction is a Multi-Stage Process: Epidemiological and Behavioural Genetic Analyses of Drug Use Transitions*  
Lindsey Anne Hines

*Health Psychology*  
*Self-As-Context in Chronic Pain: Examination of a Component Process of Psychological Flexibility*  
Lin Yu

*Health Service and Population Research*  
*Cognitive ageing and late-life depression across cultures*  
Anamaria Brailean

*Stigma among family members of people with severe mental illness*  
Chih-Cheng Chang

*Mental health staff perspectives on supporting recovery*  
Clair Paula Le Boutillier

The Impact of the Critical Tie Intervention for People with Severe Mental Illness in the Transition from Prison to the Community

Gareth Daniel Hopkin

Mental Health

Continued cannabis and risk of relapse in patients with a first episode psychosis

Tabea Schoeler

Neurobiology

Neurotrophin-3 as a promoter of spinal cord plasticity in the distal middle cerebral artery occlusion model of stroke

Christina Wayman

Neuroimaging

Quantitative white matter metrics: diffusion imaging and advanced processing for detailed investigation of brain microstructure

A multi-modal approach to characterize animal models of brain ageing

Toby Peter James Wise

Neuroimaging and Psychiatry

A Multi-Modal Assessment of Brain Alterations in Young Adults with Psychotic Experiences: Results from the Avon Longitudinal study of Parents and Children.

Leon Michel Fonville

Neuroscience

Function and assembly of Teneurin-3-positive retinal circuits

Paride Antinucci

Cleaved tau derived from human tauopathy brain induces disease-associated deficits in a novel mouse model

Marie Katrin Bondulich

Targeting chondroitin sulfate proteoglycans to promote repair and functional recovery after spinal cord injury

Emily Rachel Burnside

Live imaging of the axon initial segment

Adna Siana Dumitrescu

Investigating the cellular response to mitochondrial dysfunction in Drosophila

Olivia Frances Duncan

Neurochemistry in autism spectrum disorder: a translational approach

Alice Marie Sybille Durieux

Investigating Chondroitin Sulphate Proteoglycans as a Potential Therapeutic Target for Parkinson's Disease

Edward Joseph Richard Fletcher

Molecular mechanism involving tau fragmentation that underline the development of tau pathology caused by tau fragmentation

Tong Guo

Investigation of sensory nerve activity and mitochondrial function in models of chemotherapy-induced peripheral neuropathy

Holly Lorraine Hopkins

Isolation of sensory neurons in vitro and generation of a conditional inducible transgenic mouse line against nerve growth factor (NGF) receptors to investigate the role of NGF in pain

Jayne Hannah Kelleher

Role of Acs4 and Synj2 in progressive hearing loss.

Elisa Martelletti

Advancing animal models of depression: a behavioural, cellular and molecular approach

Ksenia Musaelyan

Spinal cord pathology in CLN1 disease: A novel therapeutic target

Hemanth Ramesh Nelvagal

Investigating the contribution of astrocytes and neuroinflammation to pathological tau changes in Alzheimer's disease.

Emma Claire Phillips

Translating genetic findings into an understanding of neurobiological risk mechanisms for schizophrenia

Rodrigo Roberto Rafagnin Duarte

The role of clusterin in the amyloid cascade in human iPSC-derived neurons

Jacqueline Paula Sahakian Robbins

The anatomy of the corpus callosum: from post-mortem histology to in vivo tractography dissections in the healthy and autistic brain

Stefano Sandrone

Characterization of in vivo generated supernumerary neural progenitors in Drosophila melanagastes.

Rachel Emma Shaw
Old Age Psychiatry

A Blood-Based Signature of Neocortical Amyloid Burden: An Early Diagnostic Population Screening Tool for Alzheimer's disease

Nicholas James Ashton

Psychiatry

Modelling oxidative stress in human hippocampal progenitor cells: insight into the pathogenesis of depression and antidepressants action

Natalia Sergeevna Bakunina

The Course of Cognitive Impairment across the Psychosis Spectrum

Josephine Anne Mollon

Psychological Medicine

What's it like to have a partner in the UK Armed Forces? Influences on the mental health and well-being of women.

Rachael Gribble

Novel methods for measuring cortisol levels in patients with stress, affective disorders and chronic fatigue syndrome

Andres Ruben Herane Vives

Long-term antipsychotic polypharmacy prescribing in secondary mental health care: detection, predictors and outcomes.

Giouliana Kadra-Scalzo

An investigation into the therapeutic utility of transcranial direct current stimulation in bulimia nervosa

Maria Kekic

Mental Health in Rheumatoid Arthritis

Faith Matcham

Psychological Medicine Research

A human in vitro model to investigate the effects of inflammation on adult hippocampal neurogenesis in the context of depression.

Alessandra Borsini

Fatigue and inflammation: a psychoneuroimmunological approach to chronic fatigue

Alice Elizabeth Russell

Psychology

A longitudinal investigation of information processing biases and self-reported cognitions and behaviours in Chronic Fatigue Syndrome

Alicia Maria Hughes

Impact of childhood maltreatment on treatment outcomes for common mental health disorders at an Improving Access to Psychological Therapies service.

Jithani Myanthi Lennox

The neurocognitive correlates of co-occurring anxiety in children at increased familial risk for Autism Spectrum Disorder

Bosiljka Milosavljevic

The Contribution of Dissocial Personality Disorder to Cognition, Emotion Processing and Clinical Outcome in Violent Men with Psychosis.
