

## **Department of Engineering – Studentships for starting in February or June 2022**

The Department of Engineering at King's is growing with new labs and facilities opening in 2022. With this growth, we have a number of fully funded studentships home and international studentship (up to 8 in total) available to start in the current academic year (2021/22). The studentships include tuition fees, stipend, and research support over 3.5 years.

If you are interested, we encourage you to contact our engineering academics whose research areas align with your interests to let them know you would like to apply for a studentship and discuss potential projects.

Applications for our programmes need to be made via [King's Apply](#). Please mention 'department studentships' in the funding section of your application.

You should submit your applications as soon as possible as we will be continuously reviewing applications and making offers with the latest by the 1 March 2022.

We have postgraduate entry points in **February and June 2022** and no later start date is possible. Please see our [webpages](#) for the application deadline for these entry points.

For any additional information, please contact [pgr-engineering@kcl.ac.uk](mailto:pgr-engineering@kcl.ac.uk) with the subject 'departmental studentships'.
