

International Women's Day

2020

What is acceptable behaviour in the workplace?

In your view, how acceptable, if at all, is it to do the following in the workplace?

Global totals

% Acceptable

Compliment someone of the same gender on their appearance or dress

Hug someone because they are crying

Compliment someone of the opposite gender on their appearance or dress

Ask a colleague for a date

Tell stories or jokes of a sexual nature

Continue to ask a colleague for a date when they have said no before

Show or display material of a sexual nature

What harms women's careers?

Please say whether you think each of the following is more likely to damage the career of a woman who does this, more likely to damage the career of a man who does this, whether they are equally likely to damage the career of men and women who do this or that it will damage the career of men or women who do this.

Global totals	More likely to damage the career of a woman	More likely to damage the career of a man
Having childcare responsibilities during the working day	35%	8%
Rejecting a colleague who wanted a date or romantic relationship	26%	7%
Prioritising your family over work	25%	9%
Being unable or unwilling to work beyond your contracted hours	16%	9%
Working part-time	15%	10%
Talking about your family life	14%	6%
Being unable or unwilling to socialise with colleagues outside of working hours	12%	9%
Working from home regularly	12%	7%
Having different interests or hobbies to your colleagues	7%	6%

Please say whether you think each of the following is more likely to damage the career of a woman who does this, more likely to damage the career of a man who does this, whether they are equally likely to damage the career of men and women who do this or that it will damage the career of men or women who do this.

Being unable or unwilling to socialise with colleague outside of working hours

Base: 20,204 online adults aged 16-74 across 27 countries, 24 January – 7 February 2020

Please say whether you think each of the following is more likely to damage the career of a woman who does this, more likely to damage the career of a man who does this, whether they are equally likely to damage the career of men and women who do this or that it will damage the career of men or women who do this.

Working from home regularly

Base: 20,204 online adults aged 16-74 across 27 countries, 24 January – 7 February 2020

Please say whether you think each of the following is more likely to damage the career of a woman who does this, more likely to damage the career of a man who does this, whether they are equally likely to damage the career of men and women who do this or that it will damage the career of men or women who do this.

Working part-time

Base: 20,204 online adults aged 16-74 across 27 countries, 24 January – 7 February 2020

Please say whether you think each of the following is more likely to damage the career of a woman who does this, more likely to damage the career of a man who does this, whether they are equally likely to damage the career of men and women who do this or that it will damage the career of men or women who do this.

Having childcare responsibilities during the working day

Base: 20,204 online adults aged 16-74 across 27 countries, 24 January – 7 February 2020

Please say whether you think each of the following is more likely to damage the career of a woman who does this, more likely to damage the career of a man who does this, whether they are equally likely to damage the career of men and women who do this or that it will damage the career of men or women who do this.

Being unable or unwilling to work beyond your normal working hours

Base: 20,204 online adults aged 16-74 across 27 countries, 24 January – 7 February 2020

Please say whether you think each of the following is more likely to damage the career of a woman who does this, more likely to damage the career of a man who does this, whether they are equally likely to damage the career of men and women who do this or that it will damage the career of men or women who do this.

Technical note

- These are the findings of a survey conducted in 27 countries via Global Advisor, the online survey platform of Ipsos, between 24 January - 7 February 2020. For this survey, Ipsos interviewed a total of **20,204** adults aged:
 - 16-74 in Argentina, Australia, Belgium, Brazil, Chile, China, France, Germany, Great Britain, Hungary, India, Italy, Japan, Malaysia, Mexico, Netherlands, Peru, Poland, Russia, Saudi Arabia, Spain, and Sweden;
 - 18-74 in Canada, South Africa, Turkey, and the United States of America;
 - 19-74 in South Korea;
- The sample consists of 1,000+ individuals in each of Australia, Brazil, Canada, China, France, Germany, Great Britain, Italy, Japan, Spain, and the U.S., and of 500+ individuals in each of the other countries surveyed.
- The data is weighted so each country's sample composition best reflects the demographic profile of its adult population according to the most recent census data, and to give each country an equal weight in the total "global" sample. Online surveys can be taken as representative of the general working-age population in Argentina, Australia, Belgium, Canada, France, Germany, Great Britain, Hungary, Italy, Japan, Netherlands, Poland, South Korea, Spain, Sweden, and the United States. Online samples in other countries surveyed are more urban, more educated and/or more affluent than the general population and the results should be viewed as reflecting the views of a more "connected" population.
- Sample surveys and polls may be subject to other sources of error, including, but not limited to coverage error, and measurement error. The precision of online surveys conducted on Global Advisor is measured using a Bayesian Credibility Interval. Here, the poll has a credibility interval of +/-3.5 percentage points for countries where the sample is 1,000+ and +/- 4.8 points for countries where the sample is 500+. For more information on the Ipsos use of credibility intervals, please go to: https://www.ipsos.com/sites/default/files/2017-03/IpsosPA_CredibilityIntervals.pdf.
- Where results do not sum to 100, this may be due to computer rounding, multiple responses or the exclusion of don't knows or not stated responses.
