International Biometals Society

The International Biometals Society (IBS) was formed at the 7th International Biometals Symposium held in Tucson, Arizona (USA) in July 2010. The aims of the Society are to promote research in the field of metal interactions in biology and to encourage the interdisciplinary exchange of information on this subject at a biennial symposium. The Journal of the Society is *BioMetals* published by Springer, London and it will carry announcements about the Society. Information about the IBS can also be found on this home page.
