

Jonna Kuntsi

*Professor of Developmental Disorders
& Neuropsychiatry*

MRC SOCIAL, GENETIC &
DEVELOPMENTAL PSYCHIATRY CENTRE

My research focuses on attention-deficit/hyperactivity disorder (ADHD) and other disorders that often occur with it. One of my current questions asks, ‘Why is preterm birth a risk factor for ADHD?’ Research is teamwork: I feel privileged to work with many talented PhD students, as well as with numerous international colleagues on various collaborative projects. I have two daughters, and they make sure there’s lots going on in my life beyond work.
