and social worker

---

Reflections

# Programme

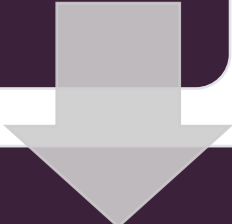

---

# Background

PWD diagnosed every  
**3 seconds** (ADI, 2021)

55 Million people  
worldwide are living with  
dementia of which 60%  
in LMICs (WHO, 2021)

94% PWD in LMICs are  
cared for at home  
(Prince *et al.*, 2015)

---

# Research question

What is it like to live with or care for someone with dementia?

---

# Official classification

- Black African ( 9 groups)
  - Coloured\*
  - Indian / Asian
  - White
  - 11 Official languages
-

# Demographics

- 3 Ethnic groups (Coloured, Black African and White)
- 18 PWD
- 30 Care partners (CPs)
- 103 qualitative interviews
- Transcribed verbatim, analysed using Nvivo and manual coding.

\*Some PWD were also CPs

Aspect	Description	PWD	Care partners
Gender	Male	7	9*
	Female	11	26*
Ethnic group	Coloured	8	18
	Black African	3	4
	White	7	11
	Indian/Asian	0	1
Age (mean)	Male	81 (75-87)	62 (43-87)
	Female	75 (62-89)	59 (34-84)

# Socioeconomic backgrounds

**Low** household income

Prior engagement with social services

**Middle and high** household income

No prior engagement with social services

---

# Research strategy

ASPECT	DESCRIPTION
Research design	Informed Constructivist Grounded Theory
Setting	Three municipal areas of Eden District in Western Cape province, South Africa (George, Oudtshoorn and Mossel Bay).
Recruitment	Local memory clinic and research centre, newspapers, radio talks, and word of mouth.
Sampling	Purposive and snowball sampling followed by theoretical sampling.
Participants	Persons with dementia aged 60 and older.  Care partners that supported the PWDs.

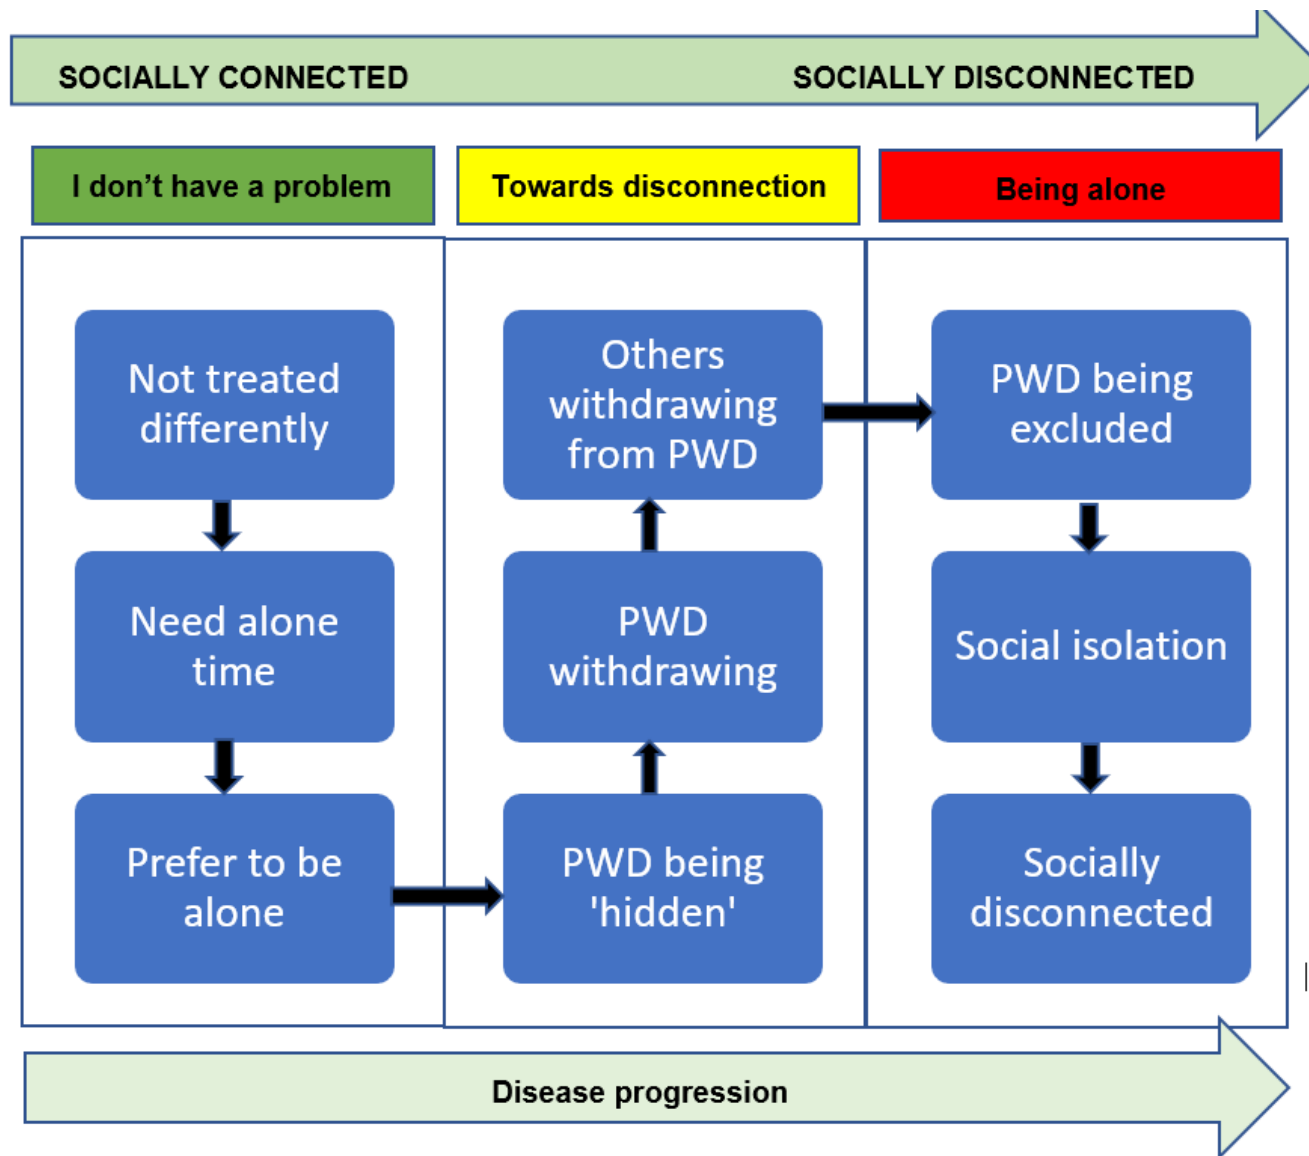

ASPECT	DESCRIPTION
<b>Data collection</b>	
<b>a) Screening instruments</b>	<ul style="list-style-type: none"> <li>Community Screening Instrument for Dementia (short version) (CSI'D)</li> </ul>
<b>a) Demographic questionnaire</b>	<ul style="list-style-type: none"> <li>Demographic information of participants</li> </ul>
<b>a) Languages</b>	<ul style="list-style-type: none"> <li>Afrikaans and English</li> </ul>
<b>a) Repeated interviews</b>	<ul style="list-style-type: none"> <li>Participant homes or memory clinic offices.</li> <li>Pre-interview plus up to four interviews per participant.</li> <li>Audio-recorded and transcribed.</li> </ul>
<b>Data analysis and transcription</b>	<ul style="list-style-type: none"> <li>Transcribed by researcher.</li> <li>Analysis assisted by NVivo.</li> </ul>
<b>Ethics</b>	<p>University of Edinburgh (UoE) REC (UK)</p> <p>Human Science Research Council (HSRC) REC (SA)</p> <p>Department of Social Development (DSD) REC (SA)</p>

# Findings

# Continuum between feeling socially connected and socially disconnected

# Four factors

Predominant care practice (Albert, 1990, Pyke & Bengtson, 1996)

- Communal
- Individualist

Attitude toward exchange (Murstein *et al.*, 1977, Molm, 2003)

- Non-exchange oriented
- Exchange oriented

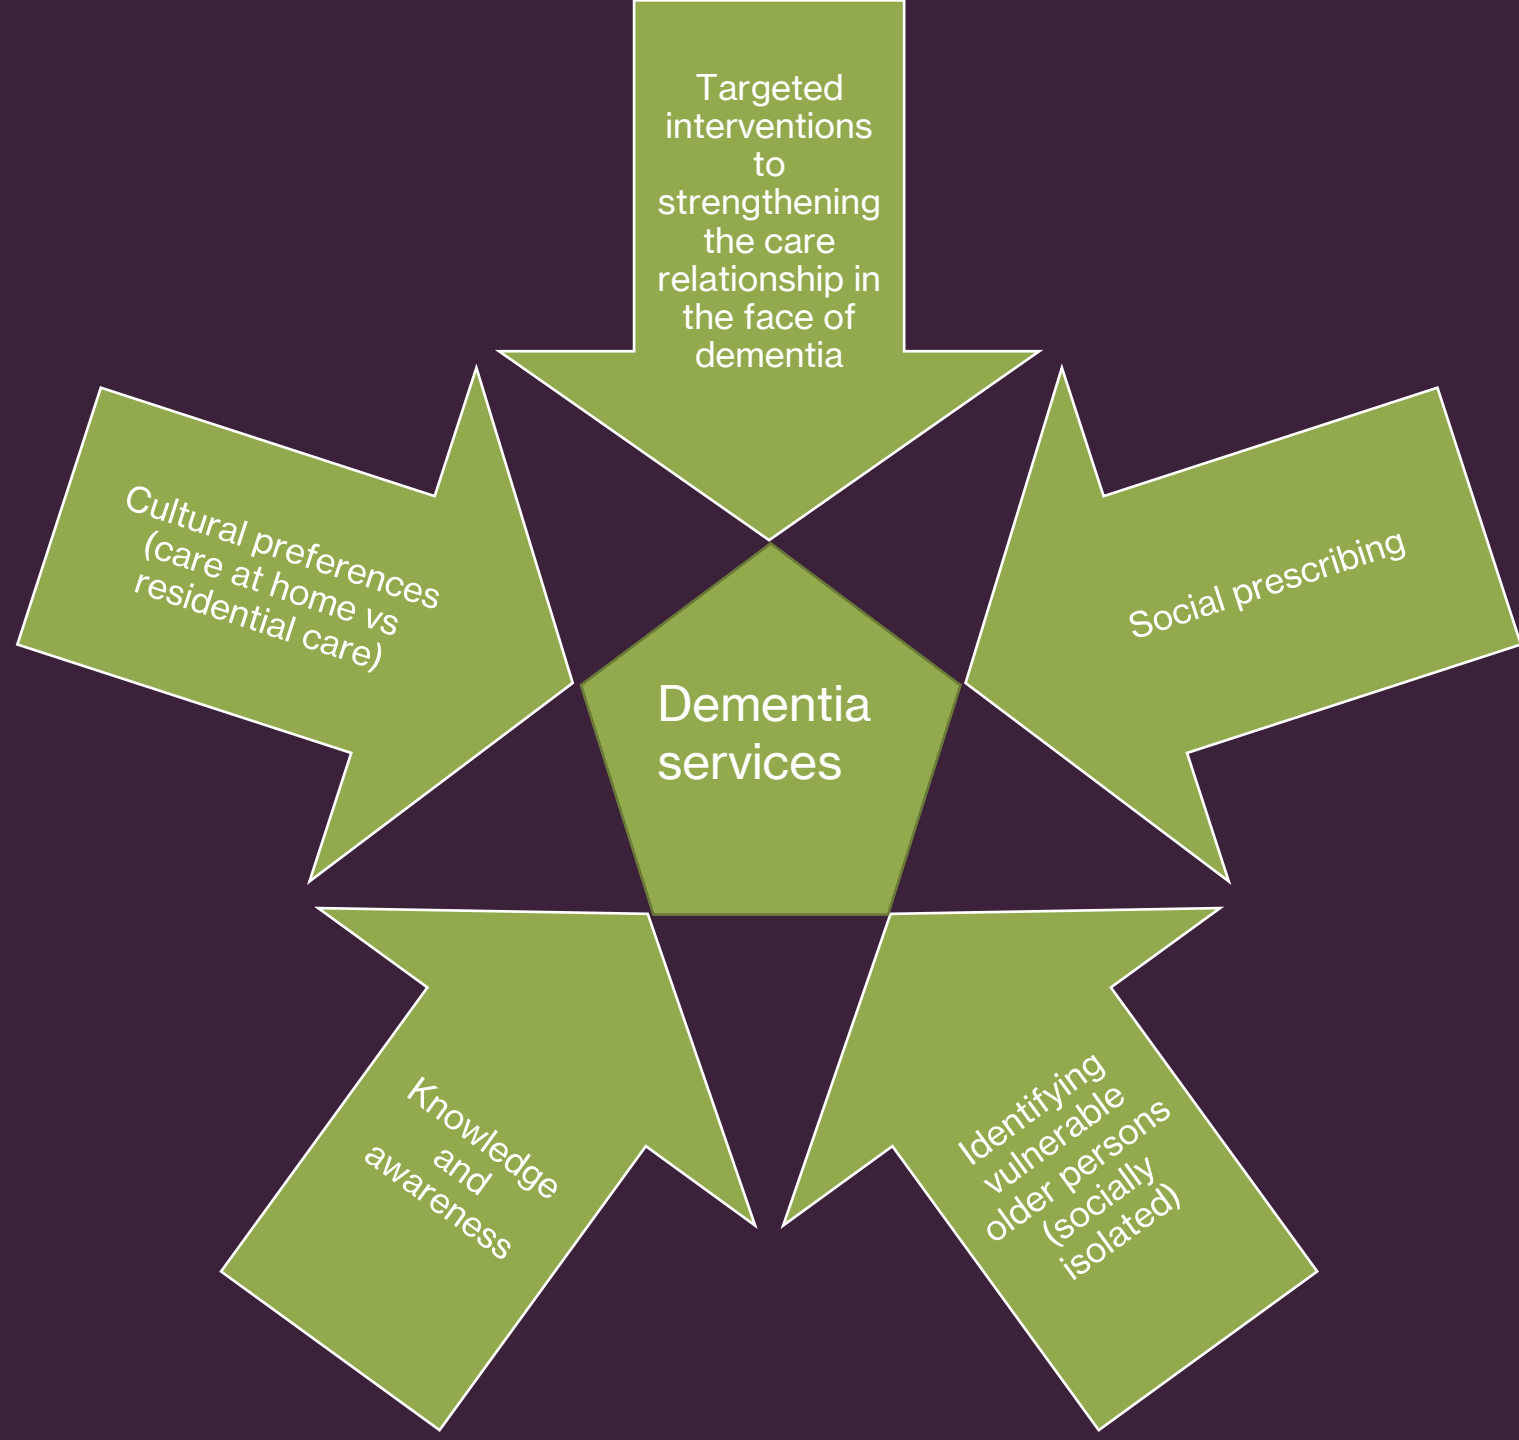

Type of reciprocity (Sahlins, 2017)

- Generalised
- Balanced

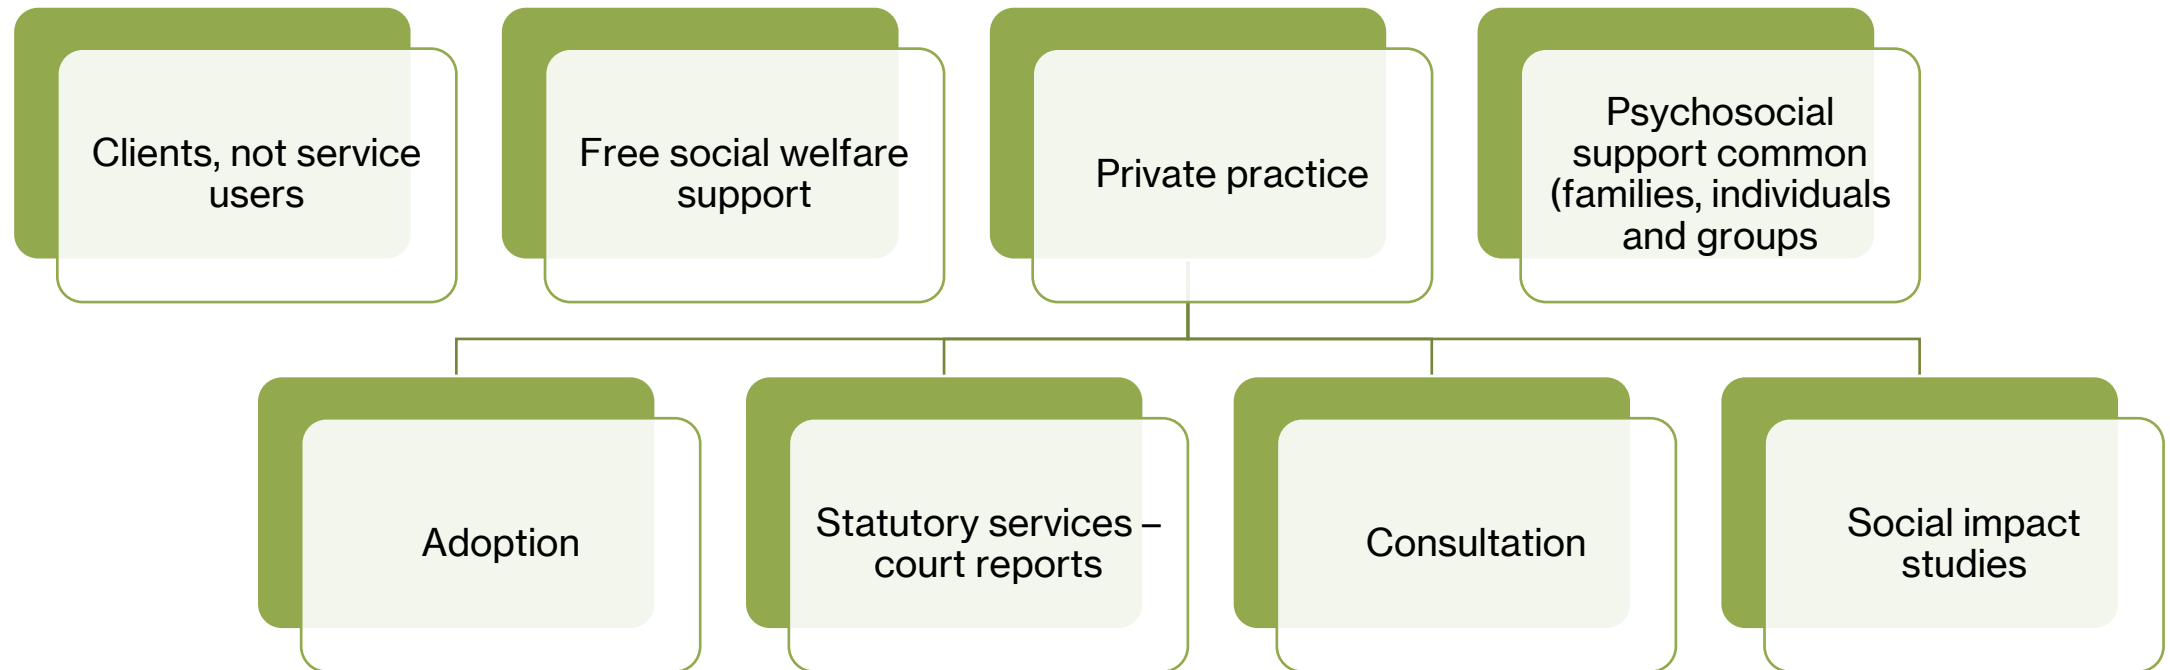

Relationship type (Clark & Mills, 1979, 2012)

- Communal
  - Exchange
-

# Implications for practice

# Social work in SA

# Different identities

**Low** household income

**Prior engagement with social services**

Not familiar with concept and process of research

Engaging with me as **social worker**

**Middle and high** household income

**No prior engagement with social services**

Familiar with concept and process of research

Engaging with me as **researcher**

---

# Role conflict

As a **researcher** –  
establishing research  
relationship (time bound),  
trust, objectivity – **research  
ethics**

As a **social worker** –  
establishing social work  
relationship (ongoing), trust,  
psychosocial support,  
available when needed, duty  
to care - guided by  
professional **code of conduct**

---

# Reflections

Power  
dynamics

Remuneration  
/ tokens of  
appreciation

Taking  
consent

Recruiting

Anonymity

Dementia /  
memory  
difficulty

Normal part of  
ageing vs  
disease

Permission to  
interview  
other parties

Who silences  
the voices of  
PWD

Cultural  
awareness

---

## **Lessons learnt**

---

Role conflict can be a challenge

Reflexivity and  
positionality

Adaptability – process  
and personal

# In conclusion

*“We are hardwired to connect with others, it is what gives purpose to our lives, and without it there is suffering. From the time that we are born we need connection to thrive emotionally, physically, spiritually and intellectually.”*

Brene Brown (2010)

---
