

Facilitators and barriers in the digitalisation of care homes - Perspectives from managers of small care homes

Are you the manager of a residential care home for people aged 65 years and older?

Does the care home you manage belong to a small provider (owning less than 5 homes)?

Have you thought about or already started rolling out technology to run your care home day to day?

If you answered 'yes' to the above questions, you could be involved in our research.

We are looking for people to help us understand the experiences of care home managers on their journey to digitise their care home and what could help them to take next steps

There are several ways you could be involved:

- You could talk to us (30 minutes or less) on the phone or online about your experiences of or starting to think about digitalising your care home
- You could fill out our survey (5 minutes)
- You could join our experts by experience group to discuss
