Emergency Card

APPROACH GENTLY

CHECK FOR RESPONSE AND SIGNS OF OVERDOSE

If the person is not responsive:

CALL 999
Give the exact address and your phone number to the operator

CHECK AIRWAY AND BREATHING
Clear if necessary

PUT IN THE RECOVERY POSITION

NOT BREATHING NORMALLY

GIVE NALOXONE
Inject into the muscle: buttock, upper arm or outer thigh
1. Insert the needle at 90 degree angle to the muscle
2. Push down the plunger on the syringe
3. Put syringe back in box. Don’t cover needle
Tell the paramedics what you have found, seen and done
