

## King's College London Course on Simultaneous PET-MR: Science and Practice 2019

### Feedback from the live course in London

- Very useful overview of both modalities for a range of individuals from different backgrounds
- Excellent for researchers who would like to do PET-MR work
- Excellent organisation & teaching at multi-level approach. Fantastic memory refresh / consolidation quizzes .
- An excellent and informative academic activity that can be comprehended by participants from very different backgrounds.
- Very complete course, but for someone with no MR experience or background.
- Well organised and structured. Highly recommended.
- Comprehensive, from both technical to clinical
- It was extremely useful and really helped improve my PET/MR knowledge
- Excellent course! I learnt a lot!
- Excellent course! Great to get USB.
- Very, very informative, digestable materials, great lectures, very interactive and well-structured.
- Perfect attendee numbers for great idea-exchanges + networking. I loved it!
- Was a wonderful experience to be back at the center where I had my first PET/CT Training in 2007.
- Thank you so much! I really enjoyed the course.
- The visits to the departments really add up to the course. Good refreshments and very organised arrangements.
- The combination of Science and clinical application was great, a real synergy.
- Placing the physics with clinical discussion was great. Also interactive session & explanations. Great to give PET focus group highlight CT end when some were in MRI focus group.
- All the speakers were really enthusiastic about their topics and made it very engaging!
- It was near perfect. I do not think you could change much.
