

PGR Radiopharmacy Online course – Dec 202 feedback

- Good for students and operators new to radiopharmacy, but great for me as an experience radiopharmacy tech to keep my knowledge up to date. and be able to learn my knowledge out to new users
- These course was really good for remember concepts but also see new things in good proportions
- Definitely. Would also be interested in doing the next level of this course when it runs in March next year.
- Brilliant course, as helped to build on my knowledge.
- Very thorough course
- Yes, definitely. Very informative and provides a very good grounding in multiple aspects of radiopharmacy work
- I would definitely recommend to anyone new to radiopharmacy - level of detail for radio aspects is great; there is some level of medicinal chemistry/biology knowledge required which might reduce accessibility a little bit (e.g. I have a chem background so I understood chemistry easily, whereas some of the more biology based aspects used non-laymen terms I had to look up) - but overall I think it's a good level!
- Yes, I found it very informative. It has been useful to help my knowledge of what I am actually doing in the radiopharmacy.
- The course was really good. No improvement
- "I thought it was excellent the way it was - well presented, kept to time and good break sessions in between.
- Lectures were well presented and very useful to have the notes in front to scribble my own notes on.
- Would also be good to keep the MS Teams option running for those of us who live so far away from London."
- I can't think of any way the course could be improved.
- Great course, "
- "I really enjoyed the course, it gave me a lot of directions for self guided study after the course. So, couldn't really comment on improvements to be made.
- I enjoyed the online sessions
- Well done on a massive effort bringing the course to us virtually.
- I think it worked online quite well, possibly easier for those that would maybe have had to travel quite a distance to attend.
- it was well organised! many concepts!
- Well presented. and looking forward for further course
- Think you all did an amazing job. Well done
- Hopefully we all see each other face to face.
- Thank you so much for the informative course. You are utter pros to carry this out via teams so well.
- enjoyed it in these bizarre times :) thanks

- Drug interaction sections was also good. It was also good to get a feel as to what Guys do radiopharmacy in comparison to Oxford. (this would be good to see if possible sometime!) Thanks for running!
- Thank you to all the lecturers.
- The course was really well organised.
- Thank you very much everyone.
- Really worthwhile course. Thank you
- A very interesting and thorough course.
- Thank you very much
- Good course - thank you
- Thanks very much! Enjoyed the content over the past few days.
- Excellent course - thank you!"
- Great course overall! I feel like I learned a lot and got an invaluable experience!
- Excellent course, thank you all for your hard work during these tough times.
- Thank you for giving informative lectures!
- It was really enlightening and I really enjoyed it
- I really enjoyed the course, even though it was virtual. Of course it would be nicer in person, but given the circumstances I thought it was done really well.
- Well done Victoria and Jas!!! Really Great COURSE!!
