

## The ESRC Centre for Society and Mental Health Opportunities for Early Career Researchers

Early career researchers at all levels will have opportunities to contribute to projects across all programmes (and at post-doctoral level co-lead these) and participate in our scientific and other board meetings and discussions, providing on-the-job experience.

They can also benefit from

- formal mentorship and an extensive range of career development initiatives and support at King's
- visiting fellows exchange programmes with our partners
- from internships with policy and community organisations
- formal education and training courses, from MSc modules to methods-based short courses, including through our ESRC London Interdisciplinary Social Science Doctoral Training Partnership (and other DTPs), and a new MSc in Society and Mental Health.
