

4-year MRC/Sackler PhD fellowships

Outstanding students are sought for our prestigious, fully funded PhD programme at the MRC Centre for Neurodevelopmental Disorders, based at King's College London.

The Centre focuses on understanding the basic mechanisms underlying disorders such as autism, epilepsy and schizophrenia. We use cutting-edge technology in patient studies, stem cells and a range of animal model systems.

More info & application link:

Fully funded fees and
~£24 000 p/a stipend

Application deadline:
23:59 2nd January 2023

Interview dates:
23, 24, 25 January 2023

More information:
<https://devneuro.org/cnodd/mres-phd.php>

Benefits of our programme include:

- A unique environment that brings together clinicians and neuroscientists
- Lab rotations in first year help develop a diverse range of skills and an informed choice of PhD project
- Vibrant and exciting central London locations

Basic scientists and clinicians encouraged to apply.

We value diversity and welcome applications from across the community. All appointments are made solely on merit.
