

King's-China Scholarship Council PhD Scholarship programme (K-CSC)

Guide to finding a supervisor

When applying for the K-CSC, you are strongly encouraged to make contact with a suitable King's supervisor who is able to supervise your research and support your application for the K-CSC. Please state the proposed supervisor's name in your online admissions application form (within the 'Research Proposal' section/Supporting Statement Category) by the deadline of **4 January 2022, 23:59 GMT**.

This guide offers you advice about how to search for a supervisor and it also provides a list of useful contacts within each faculty who can assist you.

How to Find a Supervisor

1. Find out about the wide range of expertise and research activity at King's, by searching our online research portal (<https://kclpure.kcl.ac.uk/portal/>) as well as [King's website](#). Please browse using keywords. For example, searching for 'robotics' on the research portal provides a list of 12 researchers in both engineering and bioengineering.
2. Once you have identified an academic that you would like to work with, please contact them using the email address provided on the research portal/website.*
3. If you have any problems finding a suitable academic through the research portal/website and you need some assistance, please get in touch with a relevant point of contact, as listed within this document under the respective faculty pages.*
4. You may be required to submit a draft proposal of your research ideas to the potential supervisor/faculty point of contact to find out whether there is a match of interests. This proposal would typically be half a page to a page (of A4) in length. In some disciplines, you may then need to produce a more detailed research proposal as part of your formal online application, with guidance from your potential supervisor.
5. Once you've discussed your ideas and confirmed a supervisor, please follow the application instructions, provided here (<https://www.kcl.ac.uk/study/funding/kings-china-scholarship-council-phd-scholarship-programme-k-csc>) to submit your formal application.

****NOTE: When you get in touch with a supervisor or faculty contact, please ensure that you make it clear that you intend to apply for the K-CSC scholarship. Please also be aware that a response might not be provided instantly and may take at least a couple of days. Your patience is appreciated.***

Faculty of Arts & Humanities

As one of the world's leading centres of research in arts and humanities, King's is an excellent place to pursue a PhD. Our research strengths cover all disciplines including new fields such as culture, media and creative industries and digital humanities.

Ninety nine percent of our research has been judged as having an outstanding or very significant impact in the wider world according to the most recent Research Excellence Framework.

Home to one of the largest populations of postgraduate research students in the country, we offer students a rich and stimulating environment for study and research.

Theology & Religious Studies	Dr Jonathan Stökl jonathan.stokl@kcl.ac.uk

Faculty of Dentistry, Oral & Craniofacial Sciences

Excellent facilities, cutting edge technology and our international collaborations underpin our research.

Our research atmosphere is friendly, encouraging and positive, and the success rate is high. All students are allocated a Postgraduate Coordinator (PGC) in addition to their supervisors, to provide additional support and review progress.

For more information, please visit: <https://www.kcl.ac.uk/dentistry/research/phd-opportunities>

Points of Contact

Vice-Dean International (research)	Professor Jeremy Green jeremy.green@kcl.ac.uk
Associate Dean for Postgraduate Research	Professor Agamemnon (Agi) Grigoriadis agi.grigoriadis@kcl.ac.uk
PhD Programme Administrator	Emily Helder emily.helder@kcl.ac.uk

Faculty of Life Sciences & Medicine

The Faculty offers unrivalled opportunities for graduate research.

Our graduate research community comprises over 600 graduate research students. Every student benefits from training and development opportunities which help them develop generic and subject-specific skills.

For more information, please visit: <https://www.kcl.ac.uk/lsm/research/postgraduate-research>

Faculty of Natural, Mathematical & Engineering Sciences

Studying in the Faculty of Natural, Mathematical & Engineering Sciences will enable you to work with a distinguished network of scientists.

The Faculty incorporates a wide range of subjects from the fundamental sciences of mathematics and physics to informatics. You will join a vibrant research community which is continually striving to develop further established areas of excellence and to implement new and exciting research initiatives, offering students challenging and innovative degrees.
