Our Fixed & Removable Prosthodontics MClinDent is a comprehensive restorative dentistry course focusing on fixed and removable prosthodontics, designed to advance skills in complex multi-disciplinary dental problems.

Designed for dental practitioners in high-level practice, you will use these skills in your own practice throughout the course. This course is mostly delivered online, so you can study anywhere in the world with minimum disruption to your professional and personal life while benefitting from world-class teaching.

### Key benefits
- Internationally renowned centre of excellence for teaching and research in dentistry.
- Pioneers of distance learning in dentistry with over 20 years’ experience.
- Course material delivered by a team of highly experienced clinical tutors and academics, many of whom are world-leaders in their field.
- Intensive face-to-face training blocks to learn and practice contemporary clinical techniques at world-class training facilities.
- Multi-authored online course text material supported by extensive references and access to institutional library facilities.
- Online support through regular webinars and tutorials presented by core staff and expert tutors.

### Course details
This course will develop your clinical skills in restorative dentistry, enabling you to treat the variety of patients that visit your practice. We have designed the course to advance your skills, especially in complex multi-disciplinary dental problems such as tooth wear, complex aesthetics and occlusal problems.

Our course director, Professor Brian Millar, has helped many dental graduates, both nationally and internationally, to achieve their postgraduate goals, and develop their clinical skills in restorative dentistry, enabling treatment of a wider variety of patients and referring fewer patients externally.

### Intensive face-to-face training blocks
Delivered primarily online, the course also provides 28 days of intensive teaching and practical training in London. Our expert tutors will give you guidance on complex dental procedures at our specialist postgraduate teaching centre, LonDEC, situated at our Waterloo Campus, which offers state-of-the-art dental training facilities. These blocks are an invaluable way to consolidate learning and progress to the final year.

---

**2018/19 entry (January 2019 entry)**

**Duration:** four years  
**Study mode:** distance learning with face-to-face training blocks

Teaching
You will be taught mostly online through King’s E-learning and Teaching Service (KEATS) which provides information, interactive questions, assignments, use of bibliographic databases and reading material. Our students participate in online tutorials and discussion groups, interacting with expert tutors and their fellow students. Face-to-face lectures and hands-on training take place in blocks in the first three years. Students are required to undertake and build a reflective log of clinical work in their own general practice.

Clinical support for FRP students is provided through:

- clinical case discussion for diagnosis and treatment planning
- comprehensive tutor feedback on clinical work completed in practice
- case discussion opportunities during the face to face teaching blocks
- tutor guided online seminars for case discussion and treatment planning.

While advice regarding patient treatment is given by our experienced clinical team, the clinical responsibility for patient treatment remains with the clinician providing the treatment.

Typically, one credit equates to 10 hours of work.

Assessment
60% of each module will be assessed through exams and 40% through assignments, with the exception of the Clinical 1 and 2 modules which are assessed through portfolios of case work, and the Research module which will be assessed by a dissertation.

You can take your exams in London or, for overseas students, at centres in your country of residence.

Regulating body
King’s College London is regulated by the Higher Education Funding Council for England.

Course structure
Courses are divided into modules. You will normally take modules totalling 360 credits.

Required modules
You are required to take:

Year 1
- Introduction to Fixed & Removable Prosthodontics (30 credits)
- Treatment Planning & Preparation of the Mouth (30 credits)
- Complete Dentures (30 credits)
- Face-to-face training block

Year 2
- Fixed Prosthodontics (30 credits)
- Aetiology & Management of Tooth Wear (30 credits)
- Biomaterials Science (30 credits)
- Face-to-face training block

Year 3
- Advanced Prosthodontics (30 credits)
- Prosthodontic Care for Medically/ Clinically Compromised Patients & Elderly People (30 credits)
- Statistics & Epidemiology (30 credits)
- Face-to-face training block

Year 4
- Clinical 1 (15 credits)
- Clinical 2 (15 credits)
- Research (60 credits)

King’s College London reviews the modules offered on a regular basis to provide up-to-date, innovative and relevant programmes of study. Therefore, modules offered may change. We suggest you keep an eye on the course finder on our website for updates.

Location
This course is primarily taught through King’s College London’s online learning environment, KEATS. Students are required to have:

- high quality internet connection for tutorials with minimum speeds of 2Mbps down and 3Mbps up
- headset, microphone and webcam
- JavaScript, popup windows and cookies enabled.

The face-to-face component takes place for 10 consecutive days in Year 1, nine consecutive days in Year 2 and nine consecutive days in Year 3 at King’s College London, Waterloo Campus.

Students are required to have access to adequate clinical facilities and to patients requiring treatment relevant to the subject area.

Career prospects
Our graduates have continued in general practice, offering a higher standard of clinical care with increased confidence and ability. Many have used the course to enter independent practice, and some have gone on to teaching posts in universities.
Fees and funding

Part-time tuition fees – UK/EU/International
The UK/EU/International tuition fees for the 2018–19 academic year are available on the course web page.

Please note that the tuition fees for subsequent years of study may be subject to increases in line with King’s terms and conditions.

Deposit
When you receive an offer for this course you will be required to pay a non-refundable deposit to secure your place. The deposit will be credited towards your total fee payment.

The UK/EU/International deposit is £1,000.

For further information, please visit the fees and funding section of our website:
www.kcl.ac.uk/study/postgraduate/fees-and-funding/index.aspx

Additional costs
In addition to your tuition fees, you can also expect to pay for:
- travel, accommodation and subsistence for the face-to-face training blocks in London during Years 1, 2 and 3
- internet access
- computer equipment
- photography equipment (to be discussed further at enrolment):
  - a digital camera with a macro lens and ring flash
  - SD card
  - retractors and mirrors
  - a digital camcorder (does not need to be HD)
  - photo editing software
- books if you choose to buy your own copies
- library fees and fines
- personal photocopies
- printing course materials
- society membership fees
- conference attendance (optional)
- stationery
- binding for logbooks/dissertations
- blank cds/usb sticks for submitting clinical cases
- postage for mailing assignments/clinical work to London
- examination fees (if not taken at venue in London)
- graduation costs.

Students will also be expected to bear any costs relating to providing clinical treatment for the clinical cases required for the course. Access to reasonable and compliant equipment and materials will be expected.
