Our Computer Science with Intelligent Systems BSc course, offered by the Department of Informatics, will equip you with an effective and well-balanced introduction to computer science in parallel to the fundamental concepts and more specialised knowledge in artificial intelligence and cognitive systems.

**Key benefits**

- Unrivalled location in the heart of London.
- World-class university.
- 92 per cent of research outputs ranked as world leading or internationally excellent (REF 2014).
- Reputation for good teaching in a friendly environment.
- Excellent facilities for the sole use of students in the department.
- This course is currently accredited by the BCS – the Chartered Institute for IT. This certifies that our course equips students with the foundations enabling a career in computing or information systems.

**Course details**

Our Computer Science with Intelligent Systems BSc course is designed to cover everything that is indispensable for a first degree in computer science. In addition, it will introduce you to fundamental issues in intelligent systems, such as software agents, neural networks, pattern recognition, computer vision, artificial intelligence and computational intelligence. It is aimed at students who see themselves working in AI, automation, intelligent control or in the more general field of computer science.

You will have access to over 250 fast PCs running Windows and Linux. These are spread over several state of the art laboratories for the exclusive use of the Department.

Our student societies organise social and other activities.

**Teaching**

Teaching is led by the Informatics Department. You are expected to spend approximately 10 hours work per credit for each module you attend in your degree, e.g. 150 hours work for a 15 credit module. These hours cover every aspect of the module: lectures, tutorials, laboratory sessions, independent study, coursework and preparation for examinations.

**Assessment**

You are assessed through a combination of written examination, essays, practical examination, oral presentations, reports, class tests and projects. The nature of assessment varies by module.

**Regulating body**

King’s College London is regulated by the Office for Students.
Course structure

Courses are divided into modules. In each year you will normally take modules totalling 120 credits.

Year 1

Required modules
You are required to take:

- Introduction to Professional Practice (15 credits)
- Programming Practice & Applications (30 credits)
- Computer Systems (15 credits)
- Foundations of Computing 1 (15 credits)
- Data Structures (15 credits)
- Database Systems (15 credits)
- Introduction to Artificial Intelligence (15 credits)
- Pattern Recognition (15 credits)
- Computational Models (15 credits)

Optional modules
In addition, you are required to take 15 credits from a range of optional modules, which may typically include:

- Elementary Logic with Application (15 credits)
- Computational & Mathematical Thinking for Engineers I (15 credits)
- Logic Design (15 credits)
- Computational & Mathematical Thinking for Engineers II (15 credits)
- Computational Models (15 credits)
- Real Time Systems & Control (15 credits)
- Optimisation Methods (15 credits)
- Biologically Inspired Methods (15 credits)

You are also required to take 15 credits from a range of optional modules, which may typically include:

- Logic Design (15 credits)
- Introduction to Software Engineering (15 credits)
- Computational & Mathematical Thinking for Engineers II (15 credits)
- Operating Systems & Concurrency (15 credits)
- Introduction to Robotics (15 credits)
- Practical Experiences of Programming (15 credits)
- Introduction to Artificial Intelligence (15 credits)
- Signals & Systems (15 credits)

Year 2

Required modules
You are required to take:

- Robotics Group Project (30 credits)
- Foundations of Computing 2 (15 credits)
- Operating Systems & Concurrency (15 credits)
- Introduction to Robotics (15 credits)
- Practical Experiences of Programming (15 credits)
- Introduction to Artificial Intelligence (15 credits)
- Signals & Systems (15 credits)

Optional modules
In addition, you are required to take 15 credits from a range of optional modules that may typically include:

- Robotics Group Project (30 credits)
- Foundations of Computing 2 (15 credits)
- Operating Systems & Concurrency (15 credits)
- Introduction to Robotics (15 credits)
- Practical Experiences of Programming (15 credits)
- Introduction to Artificial Intelligence (15 credits)
- Signals & Systems (15 credits)
- Real Time Systems & Control (15 credits)
- Optimisation Methods (15 credits)
- Biologically Inspired Methods (15 credits)

Year 3

Required modules
You are required to take:

- Individual Project (30 credits)
- Artificial Intelligence Reasoning & Decision Making (15 credits)
- Computer Vision (15 credits)
- Agents & Multi-Agent Systems (15 credits)
- Pattern Recognition (15 credits)
- Biologically Inspired Methods (15 credits)

Optional modules
In addition, you are required to take 15 credits from a range of optional modules that may typically include:

- Real Time Systems & Control (15 credits)
- Optimisation Methods (15 credits)
- Computational Models (15 credits)

King’s College London reviews the modules offered on a regular basis to provide up-to-date, innovative and relevant programmes of study. Therefore, modules offered may change. We suggest you keep an eye on the course finder on our website for updates.

Location

The course is taught at King’s Strand and Waterloo Campuses, putting you in the heart of London with access to all its academic resources and within easy reach of the social and entertainment attractions of one of the world’s most cosmopolitan cities.

The Department of Informatics offices are based at the recently renovated Bush House on the Strand Campus.
Career prospects

The Careers Service and the Department of Informatics run a careers programme for Informatics students, which includes skills sessions and visits from top employers. Our graduates go on to successful careers in a wide range of organisations including banking, finance, management, and the major software houses, where they work mainly on analysis, design, implementation and maintenance of software applications and systems. Alternatively, many of our graduates choose further study.

Fees and funding

Full-time tuition fees – UK
The UK tuition fees for the 2019–20 academic year are available on the course web page.

Please note that the tuition fees for subsequent years of study may be subject to increases in line with King’s terms and conditions.

Full-time tuition fees – EU
Students starting their programme in 2019/20 (September 2019) who are eligible to pay EU fees will pay the same rate of tuition fees as UK students. This will apply for the duration of their programme but may be subject to change by the UK Government for subsequent cohorts from 2020/21.

The UK tuition fees for the 2019–20 academic year are available on the course web page.

Please note that the tuition fees for subsequent years of study may be subject to increases in line with King’s terms and conditions.

Full-time tuition fees – International
The International tuition fees for the 2019–20 academic year are available on the course web page.

Please note that the tuition fees for subsequent years of study may be subject to increases in line with King’s terms and conditions.

All International applicants to undergraduate courses are required to pay a deposit of £2,000 against their first year’s tuition fee. This deposit is payable when you firmly accept an unconditional offer to study with us and will be offset against your tuition fees when you join King’s.

For further information, please visit the fees and funding section of our website: www.kcl.ac.uk/study/undergraduate/fees-and-funding/index.aspx

Additional costs
In addition to the costs above, you can also expect to pay for:

• books if you choose to buy your own copies
• clothing for optional course related events and competitions
• library fees and fines
• personal photocopies
• printing course handouts
• society membership fees
• stationery
• graduation costs
• travel costs around London and between campuses
• alternative venue examination fees

Disclaimer
Although this PDF was up-to-date at the time it was produced, please make sure you check our website www.kcl.ac.uk/study or contact us directly for the very latest information before you commit yourself to any of our courses.
