International Foundation Programme 2021
King’s Foundations

Making a difference begins at King’s
Welcome to King’s

King’s has a long history of welcoming international students, and King’s Foundations is proud to play an important part in this tradition. Entering a new study environment can be challenging, not only in terms of language but also in terms of adjusting to a new academic culture.

King’s prepares and supports students in both of these areas through the King’s International Foundation Programme, providing you with the opportunity to prepare for your undergraduate degree. Our students are King’s students from day one and, alongside your academic studies, you will also be able to access all of King’s facilities, from our libraries, IT, gyms and restaurants to the King’s College London Students’ Union (KCLSU) and its student societies, activities and clubs.

With our team of highly-qualified and experienced teachers, you can be sure that you are taking the best first step towards study in the UK.

I look forward to welcoming you and working with you to realise your full potential at King’s.

Nina McDermott
Executive Director
King’s Foundations
King’s aspires to create an international community that serves the world; and the Foundation Programme plays an important role in achieving this.

The King’s Foundation Programme offers academic preparation courses for the brightest international students to prepare them for undergraduate degrees at university.

We offer eight Foundation pathways emphasising subject knowledge development and academic skills to build the overall confidence students need to succeed at university.

We also offer scholarships to new students and those who progress to King’s for their undergraduate study.

The King’s International Foundation Programme is designed and taught by King’s experts, so students are in safe hands. We guarantee an offer (or interview) for King’s undergraduate degrees. This means that if students meet the conditions of their offer, they are guaranteed a place on a King’s undergraduate degree.

To help ease the transition to a new city, we offer all of our students guaranteed accommodation at a King’s Residence for up to two years.

This includes their Foundation year and the first year of their undergraduate degree at King’s.

We want to provide every student with a positive experience while at King’s, from before they arrive right through to when they progress to their King’s degree.

We aim to inspire confidence in all of our students, helping them to reach their academic potential.

Dr Nick Pearce
Head of Foundation Programmes
King's Foundations

Accredited by the
BRITISH COUNCIL
for the teaching of English in the UK
Our pathways

The King’s International Foundation Programme and the Extended Foundation are specially designed to prepare students for their undergraduate university studies at King’s.
King’s International Foundation Programmes are designed and taught by King’s experts. Our friendly and dedicated staff are highly trained with years of experience, many of whom have a range of PhDs, Master’s degrees and professional teaching qualifications.

**Programme structure**
- Approximately 16 hours of classes per week.
- Students also need to commit to an average of 16 hours a week of independent study.
- Each pathway is taught through a combination of lectures, seminars, tutorials and labs (for science-related courses).
- Students receive dedicated support with making their university application through the UK system – Universities and Colleges Admissions Service (UCAS).
- Students are assigned a Personal Tutor who provide a wide range of academic and personal support, throughout their Foundation year.

**Extended Foundation**

We recognise that sometimes the best and brightest international students need additional preparation with their academic English before beginning their studies. Our Extended Foundation was designed with these students in mind. The intensive preparation will focus on:
- improving reading, writing, speaking and listening skills
- building confidence so students are ready to tackle subject-specific content.

Students will also receive additional academic English support throughout their Foundation year.

**Entry and duration**

There are two entry points August and September. The academic year runs September to June. Students who study on the Extended Foundation join us in August for intensive academic English preparation.

**Extended Foundation**

- Students taking this module will explore issues in modern science and their effect upon society. The ideas, cultural norms, assumptions and practices of UK academic culture and the use of analytical thinking tools.

**Entry and duration**

- Students who study on the Extended Foundation join us in August for intensive academic English preparation.

**Core Foundation Modules**

Two of the four core modules are taught to all Foundation students. The modules vary depending on the pathway to which the student has applied.

Please see pages 5-8 for detailed information on our pathways.

**Module 1: English**

**English for Scientific Academic Purposes**

Pathway 1 2 3

This module provides students with the skills they need to express themselves through speaking and writing within a variety of academic contexts in the natural sciences.

**Module 2: Science & Society**

- Students taking this module will explore issues in modern science and their effect upon society. The ideas, cultural norms, assumptions and practices of UK academic culture and the use of analytical thinking tools.

**Module 3: Business & Society**

- This module covers key aspects of British culture and western thought. The ideas, cultural norms, assumptions and practices of UK academic culture and the use of analytical thinking tools.

**Module 4: Culture & Society**

- This module investigates the alternative perspectives on contemporary issues as an engaged global citizen. It looks at British culture and western thought. It aims to teach students how to evaluate the ideas, cultural norms, assumptions and practices of UK academic culture against their own perspectives. Students are introduced to key debates and perspectives of critical and analytical thinking skills.
Choice of eight pathways to a King’s degree

We offer eight different pathways that range from humanities to science-related subject areas. All foundation pathways lead to degrees at King’s. Visit kcl.ac.uk/foundationfinder to see all your progression options.

Student testimonial

I chose the King’s International Foundation Programme because it enabled me to adapt to a new environment while advancing my academic knowledge. The different cultural backgrounds of my classmates, along with my very well-prepared teachers and tutors, certainly made the learning environment enjoyable. I would highly recommend this programme to anyone pursuing higher education in the UK. King’s International Foundation is a challenge that is definitely worth taking on.

Yihan
Biomedical Science BSc

Student testimonial

I chose my King’s International Foundation Programme course because I believed it would be a great stepping-stone for me to progress onto an undergraduate course. With dedicated tutors, well-structured classes and abundant resources available, I learned about a vast array of topics and gained valuable academic skills. I can confidently say that I improved so much personally and academically throughout my Foundation year.

Dasol
War Studies BA, International Conflict Studies MA

Yihan is from China and studied the Biology & Chemistry pathway. He progressed on to Common Year One and is currently completing his degree in Biomedical Science (BSc).

Dasol is from South Korea and studied the King’s International Relations Foundation (now Global Politics & Social Science). She progressed to War Studies at King’s and has now finished her Master’s.

“
1. **BIOLOGY**

Students will learn about:
- Biological molecules
- Homeostasis in the human body
- Energy and exercise
- Cellular respiration
- Nervous coordination, analysis and integration
- The cell cycle
- Molecular biology
- Microbiology

2. **CHEMISTRY**

Students will learn about:
- Atomic structure
- Periodicity
- Energy
- Kinetics
- Equilibria
- Redox reactions
- Analytical techniques
- Properties of solutions
- Acids and bases

---

**Biology & Chemistry**

Choose this pathway if you are interested in undergraduate degrees such as:
- Biomedical Science / Pharmacology / Biochemistry / Pharmacy / Chemistry / Neuroscience / Psychology / Medicine* / Global Health & Social Medicine

*The Biology & Chemistry Foundation requires a good level of mathematics knowledge.

---

**Computer Science & Engineering**

Students on this pathway can apply to all undergraduate degree programmes offered by the Faculty of Natural & Mathematical Sciences, such as:
- Computer Science / Computer Science with Robotics / Electronic & Information Engineering / General Engineering / Electronic Engineering with Management

*The Computer Science & Engineering Foundation requires a good level of mathematics knowledge.

---

1. **COMPUTER SCIENCE & ENGINEERING**

Students will learn:
- Introduction to Computer Science
- Introduction to Electronic Engineering
- Programming, including for large-scale systems
- Programming embedded electronic hardware

2. **MATHEMATICS FOR NATURAL SCIENCES**

Students will:
- Develop mathematical knowledge to start an undergraduate course in a range of subjects
- Understand mathematical techniques to solve simple problems
- Suggest ways to model simple mathematical concepts

---

Students interested in applying to Medicine at King’s are required to have taken the external UCAT exam and completed relevant work experience before joining the programme in September. For the complete list of entry requirements for Medicine visit our website [kcl.ac.uk/foundation](http://kcl.ac.uk/foundation).
Mathematics & Physics

Choose this pathway if you are interested in undergraduate degrees such as:

Mathematics with Management & Finance / Mathematics & Statistics / Physics with Theoretical Physics / Psychology / General Engineering / Physics

The Mathematics & Physics Foundation requires a good level of mathematics knowledge.

1. MATHEMATICS FOR NATURAL SCIENCES
Students will:
- Develop mathematical knowledge to start an undergraduate course in a range of subjects
- Understand mathematical techniques to solve simple problems
- Suggest ways to model simple mathematical concepts

2. PHYSICS
Students will learn about:
- Introduction: SI units; dimensional analysis; coordinate systems; scalars and vectors
- Mechanics
- Waves
- Atomic and nuclear physics
- Structure of matter
- Thermal physics
- Electromagnetism

Strong emphasis is placed on rigorous mathematical treatment; it is therefore essential that students have a good basic background in algebra, trigonometry and geometry.

Economics & Mathematics*

Choose this pathway if you are interested in undergraduate degrees such as:

Economics & Management/ Accounting & Finance/ Mathematics with Management & Finance / Economics / Business Management / Political Economy / Mathematics with Statistics

The Economics & Mathematics Foundation requires a good level of mathematics knowledge.

1. MATHEMATICS FOR SOCIAL SCIENCES
Students will:
- Develop mathematical knowledge to start an undergraduate course in a range of subjects
- Understand mathematical techniques to solve simple problems
- Suggest ways to model simple mathematical concepts

2. ECONOMICS
Students will learn:
- Overview of Economy activities, economic theory and background to Supply and Demand
- Micro economy and government macroeconomic policies
- Macroeconomy

Students do not need previous knowledge of economics for this course.

* Students on this pathway are eligible for all undergraduate degrees at King’s Business School.
Business Management & Social Science

Choose this pathway if you are interested in undergraduate degrees such as:

Business Management / International Management / International Development / Geography / Global Health & Social Medicine / Social Sciences

This pathway only equips students to apply for two of the four available undergraduate degrees at King’s Business School.

1. BUSINESS MANAGEMENT

Students will:
Understand the world of business
Marketing
Human resource management
Finance
Growth of small firms
The role of big business
Corporate social responsibility
Impact of technological change
Business cultures

2. SOCIAL SCIENCE

Students will learn:
Social psychology
Sociology
Global perspective on societies in the modern world
Keynes and Neoliberalism
Behavioural economics
The legacy of colonialism
Industrial psychology
Demographics in the social sciences
Nationalism; urbanism; poverty and development; emerging economies

Mathematics & Business Management*

Choose this pathway if you are interested in undergraduate degrees such as:

Accounting & Finance/ Economics & Management / Mathematics with Management & Finance / Economics / International Management/ Psychology / Business Management

The Mathematics & Business Management Foundation requires a good level of mathematics knowledge.

1. MATHEMATICS FOR SOCIAL SCIENCES

Students will:
Develop mathematical knowledge to start an undergraduate course in a range of subjects
Understand mathematical techniques to solve simple problems
Suggest ways to model simple mathematical concepts

2. BUSINESS MANAGEMENT

Students will learn:
Understand the world of business
Marketing
Human resource management
Finance
Growth of small firms
The role of big business
Corporate social responsibility
Impact of technological change
Business ethics

* Students on this pathway are eligible for all undergraduate degrees at King’s Business School.
Liberal Arts & Social Science

Students on this pathway can apply to all undergraduate degree programmes offered by the Faculty of Arts & Humanities, such as:
- Culture, Media & Creative Industries / Digital Culture / Film Studies / Politics / Liberal Arts / Philosophy / History & International Relations / Religion, Politics & Society / Social Sciences

* Students interested in applying to Law at King’s are required to take the external LNAT exam and achieve a specified grade. Find out more on our website [kcl.ac.uk/foundation](http://kcl.ac.uk/foundation)
540 International Foundation students in 2020
Welcome to London

Ranked #1 best city for international students in the world (QS Best Student Cities 2018), London is an integral part of student life, with four of our five campuses located alongside the stunning River Thames.

1. King's Strand Campus
2. King’s Bush House
3. Royal Courts of Justice
4. Maughan Library
5. Palace of Westminster
6. London Eye
7. South Bank arts complex
8. Tate Modern
9. St Paul’s Cathedral
10. King’s Waterloo Campus
11. Shakespeare’s Globe
12. Waterloo station
13. St Thomas’ Hospital
14. City of London financial district
15. King’s St Thomas’ Campus
16. King’s Guy’s Campus
17. The Shard
18. Guy’s Hospital

KEY
- King’s locations
- London landmarks
Making London home
It’s exciting to move to London and we know that students will need to have somewhere to call home.

At King’s, we offer all of our students guaranteed accommodation at a King’s Residence for up to two years – the Foundation year and the first year of undergraduate study at King’s.

Living in a King’s Residence helps students to make friends and to feel involved in the student community.

We also have dedicated Resident Assistants to support students who are under 18 years old. Please visit our website for further information on how we support students who are under 18.

We have a wide range of accommodation in London, including:
- female-only accommodation
- en-suite or shared facilities
- specific accommodation for undergraduate students
- self-catered
- rooms for singles, couples and students with disabilities
- multiple locations.

You can get help with this from our King’s Residences team:
kcl.ac.uk/study/accommodation

Student testimonial

Salman is from Saudi Arabia and studied the King’s International Foundation. He lived in King’s Residences during his Foundation year and his first year of undergraduate study.

I remember my first day in London. I had just moved into a King’s Residence and didn’t know a single person. I walked to the student common room and found someone who was doing the exact same course. Plus, we were living in rooms opposite each other! Eventually, we became a group of four. They are still my closest friends; friendships that will last a lifetime.

Salman
Law LLB
Fees, scholarships and how to apply

There are many things to consider when coming to the UK, so here are some key points to get started.

**Tuition fees**
The tuition fee for each King’s International Foundation Programme, including the Extended Foundation, is available on our website.

Please note that tuition fees for subsequent years of study may be subject to increases in line with King’s terms and conditions.

All students who hold a conditional or unconditional offer to study a King’s International Foundation Programme course are required to pay a deposit of £2,000 to secure their place on their chosen course.

The deposit will be offset against their tuition fees when they join King’s.

**Scholarships**
- King’s Scholars of Tomorrow (for incoming students)
- King’s Future Leaders (for Foundation students progressing to King’s)

For details, visit our website kcl.ac.uk/foundation

**How to apply**
All applications to the King’s International Foundation Programme are made online through our application portal, King’s Apply – apply.kcl.ac.uk

Students will need to follow the steps to register an account before they can complete the online application form.

Students also need to upload the following supporting documentation to the King’s Apply portal with their application:
- personal statement
- official academic transcript
- English language certificate.

**Tracking the application**
Students can track the status of their application through the King’s Apply portal. This includes sending messages to the admissions team with any questions about their application.

Students who submit a complete application can generally expect to receive an outcome from our admissions team within 21 days (however this may be longer during peak processing periods).

**Study visa**
Visa regulations to study in the UK can change on a regular basis. We recommend students to leave enough time to apply for a study visa.

To check the latest information and for further advice please visit the UKCISA website ukcisa.org.uk
Entry requirements

To apply for a King’s International Foundation programme, students must meet the minimum academic and English language entry requirements.

Academic entry requirements
Prospective students will need to provide a high school certificate from the student’s country of residence (outside of the UK) with the required grades.

We also accept international qualifications for most KIFP pathways, including:
- AS levels
- A levels
- IB Diploma.

Visit our website for more details: kcl.ac.uk/foundation

English language entry requirements

<table>
<thead>
<tr>
<th></th>
<th>Extended King's International Foundation</th>
<th>King's International Foundation</th>
</tr>
</thead>
<tbody>
<tr>
<td>IELTS for UKVI (Academic)</td>
<td>5.5 overall, with no skill below 5.0</td>
<td>6.0 overall, with no skill below 5.5</td>
</tr>
</tbody>
</table>

Students requiring a study visa
Students who need to apply for a UK study visa must take an approved English test with a centre approved by the UK Visas and Immigration department. King’s can only accept the IELTS for UKVI (Academic) test.

Students not requiring a visa
Students who do not require a study visa, must submit evidence of their English language proficiency.
Living in London

We aim to help students settle in quickly to life at King’s so they can concentrate on their studies.

Safety in London

As London is a busy global city, King’s takes the safety of our students very seriously.

There is swipe card access to all King’s residences and we have security on every campus.

We also offer guidance and support about individual concerns.

Find out more on our website kcl.ac.uk/study/london

Student experience

We aim to provide a positive and friendly experience for all our students.

We have a Student Engagement Team who:

• creates a safe and friendly student environment to discuss non-academic matters
• connects students to the wider services offered at King’s
• organises events and activities for students to meet each other.

We offer additional support for students under 18 years of age, including dedicated Resident Assistants and abide by the King’s College London Safeguarding Policy.

Find more information on our website kcl.ac.uk/foundation

Daily life as a King’s student

In a city like London there is always something to do and see, and in the first few weeks we organise a range of activities so that students make the most of all the opportunities that are available. Students will also have a personal tutor who will offer help and advice on all aspects of their life at King’s.

Students can also become a member of King’s College London Students’ Union and can make the most of their membership by joining a society, finding volunteering opportunities or even running for the Student Representative Council.

Our student area is a hub of daily life for students where they can meet with their classmates and use the resources available, which include:

• desktop PCs
• language learning software
• newspapers and magazines
• books recommended by tutors
• DVDs and audiobooks
• language textbooks
• graded readers
• internet access
• network printing.
