‘For almost 200 years, our research has been, and continues to be world-leading and our graduates are some of the most employable in the world. As we look forward to our 200th anniversary in 2029, we’re striving to make a positive impact through our strategic vision.

By joining King’s, you’ll become part of a diverse and welcoming community of staff and students from over 150 countries worldwide. You’ll benefit from our cross-disciplinary approach and transformative, research-led teaching, learning from academics whose research makes a positive impact on society; from gene research that will improve cancer diagnosis, to helping London solve its pollution problem. Our students are a great example of our success and their experiences shared in this guide demonstrate just that.

We are London’s most central university and life in our incredible capital is an integral part of the King’s experience. Our long-standing partnerships with institutions such as The British Film Institute, leading NHS hospitals and our many global connections, will enable you to build networks and develop invaluable skills to support you in your future career.

I hope you’ll join us as we pledge to work together to make the world a better place.’

Professor Edward Byrne, President & Principal AC

Choose King’s for...

**OUR LONDON SETTING**

London will be an integral part of your student life. King’s is the most central university in London, including four Thames-side campuses within a single square mile and one located in south London.
King’s Denmark Hill Campus, King’s College Hospital and South London and Maudsley Hospital are approximately 3-4 miles (5-6km) from our Strand, Waterloo and Guy’s campuses.
In 1829 King George IV and the Duke of Wellington founded King's College London, making King's the fourth oldest university in England. When the University of London was established in 1836, King's became one of its two founding colleges.

MEDICAL EDUCATION
The roots of medical education at King's can be traced back to 1107, from the establishment of St Thomas' Hospital, named after Thomas Becket, to the Florence Nightingale Faculty of Nursing, Midwifery & Palliative Care, established by Florence herself in 1860.

NOBEL LAUREATES
We are also famous for our distinguished contribution to arts and sciences. Some of the greatest minds have studied at King's – from Professor Peter Higgs, who received the Nobel Prize for discovering the Higgs boson, to Michael Morpurgo OBE, author of the children's book War Horse, later made into a critically acclaimed movie and West End play.

1. Florence Nightingale (1820–1910)
   Founded the world's first professional school of nursing at St Thomas' Hospital in 1860.

2. Dr Oliver Johnson
   Medicine MBBS & Director of King's Sierra Leone Partnership
   Studied Medicine at King's from 2004. From 2011, Oliver led the fight against Ebola as Director of the King's Sierra Leone Partnership. He is currently a visiting lecturer at King's.

3. Michael Morpurgo OBE
   Studied English and French at King's. His novel War Horse was adapted first for the stage, followed by a film adaptation in 2011.

4. Dina Asher-Smith
   Studied History at King's from 2014. Dina is currently Britain’s fastest woman and the 2019 World Champion at 200 metres and Olympic bronze-medalist from Rio 2016.

Discover more about the history of King's:
kcl.ac.uk/study/why-kings
Nobel Prize winners have studied or worked at King’s.

I’m so proud to be a King’s graduate. With hard work you can do anything you set your mind to.
Dina Asher-Smith
History BA

**OUR LOCATION**

‘The combination of King’s connections with leading organisations and endless opportunities in central London made studying here an obvious choice for me.’

**Calum**, Law LLB

---

**VISIT US**

Why not visit us for the day to get a taste of life in London?

[kcl.ac.uk/study/visit](http://kcl.ac.uk/study/visit)
When you join King’s as a student, you also become part of one of the world’s most dynamic cities. With London as an extension of your campus, you’ll have constant opportunities to explore and enjoy this incredible city.

Our central location, convenient transport links and established relationships across the city provide the perfect environment for you to combine your studies with your social interests. You’ll have daily access to world-class resources such as libraries, galleries, museums and top research hospitals, as well as music, theatre, the arts and sport.

DENMARK HILL
Home to the Institute of Psychiatry, Psychology & Neuroscience. Teaching and clinical skills training for the Faculty of Dentistry, Oral & Craniofacial Sciences also takes place here.

GUY’S
Health subjects including medicine, dentistry, psychology and nursing are based at Guy’s campus, next door to The Shard.

ST THOMAS’
The Florence Nightingale Museum is based at St Thomas’, along with medical teaching.

STRAND
Located on the north bank of the River Thames, the Strand Campus houses King’s College London’s arts and sciences faculties. King’s Business School is also situated in the recently acquired Bush House.

WATERLOO
A broad range of topics are taught at the Waterloo campus such as nursing, chemistry and law with facilities also provided for dentistry.

KING’S AND LONDON
The future of King’s is interwoven with the future of London – as a place to live, work, learn and experience. Incorporating London’s many possibilities within King’s education, research and service, we are putting our expertise to work to address London’s challenges and opportunities and ensure its health and success.

Our commitment to the communities and the city around us is shared across the university and is embedded in everything we do such as the London Air Quality Network that works to minimise air pollution health effects across the capital.

1. Guy’s Bar, the Students’ Union bar at Guy’s Campus
2. The Maughan Library is located on Chancery Lane, just a short walk from Strand Campus
3. Bush House, part of the strand Campus

OUR STUDENT COMMUNITY

‘The social scene here is fantastic... the Students’ Union always has events going on.’

Dana, Digital Culture BA

KING’S COLLEGE LONDON STUDENTS’ UNION

KCLSU (King’s College London Students’ Union) offers you a huge range of ways to meet new people, join societies, campaign for the things that matter to you, relax with your friends and so much more. Led by students, for students, the Students’ Union is independent from the university and here to make sure you have the best student experience possible.

KING’S SPORT

King’s Sport delivers a range of opportunities and events for students to get involved in sport and physical activity; they operate three gyms across King’s campuses and two within halls of residence.

King’s Sport also offers a sports scholarship, a social activity programme, BeActive and an online fitness rewards platform King’s Move. Whether you’re a first time participant or seasoned competitor, we have something for you to join the King’s Pride.

OUR GLOBAL OPPORTUNITIES

‘My time abroad was one of the highlights of my course so far. If you have the chance to live and learn somewhere you have never been before, just do it!’

Andreea, Film Studies BA

In most cases you won’t have to extend your degree to study abroad, and you’ll make a significant saving on tuition fees for the period you are away.
STUDENT MOBILITY

Expand your personal and academic horizons and boost your employability by spending a period of time abroad for a semester, a year, the summer or as part of a shorter, elective period.

Our exchange partners span the globe, so you could spend part of your degree in North America, Australasia, Asia, Latin America or Europe. Our summer exchange programmes are open to you in each year of your degree, so you can have multiple summer experiences overseas.

INTERCULTURAL EXPERIENCE

Explore the benefits of professional work experience overseas and international experiences in London that will boost your employability. Our Internships team will support you to explore your options and source the right opportunity for you.

Read all about student experiences at our study abroad blog:

OUR GRADUATE PROSPECTS

‘My internship taught me so many new skills and I gained invaluable opportunities to network with industry experts – it was great preparation for my future career.’

Geraint, Political Economy BA
of graduates were in work or study – the second highest for Russell Group graduates in work

Listing an undergraduate qualification from a top university on your CV is just the beginning. You’ll also be able to develop professional skills and experience to help you stand out from the crowd.

Our dedicated Careers & Employability Team are there to help whether you are discovering your career options, focusing your ideas or taking action on your career plan. They provide an outstanding range of support to explore your career ideas and develop your employability through online careers modules, employer events, skills programmes, careers fairs and an exclusive jobs portal.

kcl.ac.uk/careers

INTERNSHIPS
An internship is an excellent way to focus your career ideas, while also enabling you to apply the knowledge gained from your studies, develop your professional network and enhance your employability. At King’s we equip students to action their own meaningful work through a variety of online tools, networks and events. We also have our own curated co-curricular programmes which are available to a range of students – from work shadowing to summer internships across a range of industries, and specific support for under-represented groups.

Increasing numbers of students also have the option to gain academic credit through the completion of an internship as part of an accredited internship module within their programme. This is supported by dedicated Internship Convenors in your department and our Accredited Internships Programme, or by undertaking other experiential learning projects.

kcl.ac.uk/careers

STUDENT LEARNING OPPORTUNITIES
Enhance your university experience by completing a King’s Experience Award. Our awards cover three themes, service, leadership, and research, enabling you to develop your employability to set you apart from your peers.

kcl.ac.uk/careers

ASSOCIATE OF KING’S COLLEGE (AKC)
Broaden your perspective and tackle life’s big questions by reflecting on theology, philosophy and ethics with the Associate of King’s College. You can take this award free alongside your degree.

kcl.ac.uk/akc

Undergraduate Guide 2021 • For up-to-date course details, please visit kcl.ac.uk/ug
At King’s you’ll be part of a world-renowned university that has been delivering world-class teaching and cutting-edge research for almost 200 years.

RESEARCH SUCCESS
We’re very proud of our outstanding reputation for world leading research as a Russell Group university. Across the arts and sciences to many areas of health, our research has led to groundbreaking new discoveries and ongoing research including:

- Junior doctors Bhavagaya Bakshi (Medicine, 2011) and Miles Payling founded C the Signs in 2017—a digital health start-up that uses artificial intelligence (AI) to help doctors diagnose cancer early.
- The development of a pioneering new method to diagnose autism in adults with just a quick 15-minute brain scan.
- Discovery of DNA structure by Maurice Wilkins and Rosalind Franklin in 1953.

During your time here we’ll do everything we can to support you to achieve your potential and help you adjust to a new academic environment.

PERSONAL TUTORS
Our undergraduate students are allocated a personal tutor from within their department or faculty. Your personal tutor will get to know you as an individual and support you academically as you progress.

ACADEMIC STUDY SKILLS
All students at King’s have access to free Academic English and Study Skills support classes to help with a successful transition to study at university level.

EXPERT ADVICE
KCLSU Advice is here to support you with concerns about your academic progress or any aspect of university life—it’s free, impartial and confidential.

WIDENING PARTICIPATION
At King’s we are committed to finding the brightest minds regardless of background. We aim to care about students on an individual basis and empower them to actively explore and define their own success.

OUR FACILITIES & RESOURCES

‘It’s great that we can use facilities from all campuses and we have access to many libraries across London.’

Kadija, Digital Culture BA

26+ languages available at all levels at King’s Modern Language Centre
At King’s, we have made significant investments in our estate, libraries and IT infrastructure to ensure you have easy access to state-of-the-art facilities and resources for your studies. We also offer different methods of study to suit your individual circumstances and to add value to your learning experience.

**MODERN LANGUAGE CENTRE**

King’s Modern Language Centre (MLC) is the largest in the UK teaching over 9,000 students. As a King’s student you may have the opportunity to take a language module as part of your degree*.

The MLC also provides evening and Saturday courses, which are discounted for King’s students and alumni. We are also accredited by the CPD Certification Service.

* Please check with your department for eligibility.

**LIBRARY SERVICES**

Located at each campus, Library Services provides a huge multidisciplinary print and electronic information resource that includes over 1.2 million books and e-books plus thousands of journals to enhance your learning. During exam periods, some libraries are open 24/7 providing students with a space to study in peace at any time of the day.

**COMPUTING FACILITIES & IT SERVICES**

To help you excel during your studies, we provide a variety of IT facilities across our campuses:

- Laptop loans service (located in King’s libraries).
- College-wide wireless network and broadband access in halls.
- Lecture capture: stream lectures recorded by your tutors.

OUR FACULTIES

‘Being part of my faculty really helped me settle in. They offer so many events and opportunities to enhance your time outside of the classroom.’

Mike, Physiotherapy BSc

Find out more about what you can study across all of our subject areas on pages:

22–77
With world-leading academics from across the spectrum of disciplines, our academic faculties bring together experts in their fields. With nine faculties, institutes and schools of study, research-enriched teaching is at the heart of our courses.

**ARTS & HUMANITIES**

Our Faculty of Arts and Humanities is ranked top 10 in Europe (QS World University Rankings 2019) and offers degrees with global reach - covering culture, arts, history, languages and literature from around the world.

Our location in the heart of London means we enjoy partnerships with many renowned creative and cultural institutions, which helps to develop the content of our courses. This includes influential establishments like the British Museum, Shakespeare’s Globe, National Gallery, Royal Opera House and Somerset House Studios.

From the traditional to the contemporary – our 14 departments offer study across a diverse range of subject areas. Whether it’s exploring the ancient world, enhancing your skills in a modern language or discovering our digital future, our exciting courses will provide you with the skills and attributes sought after by today’s employers.

[www.kcl.ac.uk/artshums](http://www.kcl.ac.uk/artshums)

**DENTISTRY, ORAL & CRANIOFACIAL SCIENCES**

Ranked first in the UK and second in the world for dentistry (QS World University Rankings 2019), the Faculty is a centre of excellence for dental education, oral and craniofacial research and oral healthcare provision, and is based in the world-famous Guy’s, King’s College and St Thomas’ hospitals.

Our evidence-based, research-led degree courses provide a high level of clinical experience in ultra-modern spacious facilities. You will learn from internationally renowned expert teachers and practitioners and be exposed to a rich breadth of skills and knowledge in an exceptionally diverse clinical environment.

[www.kcl.ac.uk/dentistry](http://www.kcl.ac.uk/dentistry)
THE DICKSON POON SCHOOL OF LAW

The Dickson Poon School of Law is one of the oldest law schools in England and is recognised as one of the best law schools in the world. With a dedicated team of legal academics and professionals with diverse backgrounds, and many international partnerships, King’s brings a global perspective to law.

Located in the heart of legal London and surrounded by major law firms, the Royal Courts of Justice and the Inns of Court. The school offers a suite of innovative courses and exciting opportunities to establish links with peers and researchers, building a wider network of professional colleagues.

FLORENCE NIGHTINGALE FACULTY OF NURSING, MIDWIFERY & PALLIATIVE CARE

1st in the UK and 2nd in the world for Nursing QS World University Rankings 2019

The Florence Nightingale Faculty of Nursing, Midwifery & Palliative Care is an internationally renowned centre for the delivery of world-class education, training and research, collaborating with many of the UK’s leading NHS trusts based across London. We teach our students to become the nurses and midwives of tomorrow, caring for people in the most effective way possible and developing skills to tackle the big questions that impact on the health and wellbeing of individuals, families and populations, whilst preparing them for success anywhere in the world.

kcl.ac.uk/nmpc

INSTITUTE OF PSYCHIATRY, PSYCHOLOGY & NEUROSCIENCE

At the Institute of Psychiatry, Psychology & Neuroscience (IoPPN), making a difference is at the heart of what we do. Our aim is to understand how the mind and brain work in order to improve mental health care in the UK and across the world.

Studying at the IoPPN means learning from world-leading academics at the forefront of groundbreaking research, and studying in brand new, state-of-the-art facilities in the very heart of London. The IoPPN is one of the world’s leading centres for neuroscience, and has more highly cited research papers in psychology and psychiatry than any other university in the world (Scopus 2016).

kcl.ac.uk/ioppn
KING’S BUSINESS SCHOOL

King’s Business School is ranked first in London for Business & Management studies (The Complete University Guide 2020) continues to shape an innovative model of business education, developing leaders equipped to tackle the business and societal challenges of the future.

Located in the iconic Bush House building, the school is a hub for engagement with business, the city, government and NGOs. With London’s Square Mile – a global centre for commerce and finance – on their doorstep, students will find networking and employment opportunities plentiful. With students from nearly 100 countries, the school’s international population brings diverse ideas and perspectives to an exciting learning environment.

kcl.ac.uk/business

NATURAL & MATHEMATICAL SCIENCES

The Faculty of Natural & Mathematical Sciences has a tradition of excellence, which includes world-leading research, six Nobel Laureates among our distinguished former staff and students, and a commitment to promoting the careers of women in science. The Faculty offers undergraduate courses in biomedical engineering, chemistry, computer science, electronic engineering, general engineering, mathematics and physics. Our student societies offer a fantastic way to meet new people and broaden your knowledge and skills. By tackling global challenges and answering fundamental questions about our universe, we aim to develop and inspire the next generation of scientists and future leaders.

kcl.ac.uk/nms

LIFE SCIENCES & MEDICINE

7th in Europe for Life Sciences & Medicine QS World University Rankings 2019

The Faculty of Life Sciences & Medicine is one of the largest and most successful centres for research and education in the UK.

We provide a comprehensive education and training portfolio including health professions and biomedical science programmes. Through partnerships with major London teaching hospitals and links to industry and medical research organisations, we translate cutting-edge research into excellent patient care, bringing lasting improvements to the quality of people’s lives.

kcl.ac.uk/lsm

SOCIAL SCIENCE & PUBLIC POLICY

Consistently ranked top six in the UK for social sciences (Times Higher Education World University Rankings 2014–19) and located at the heart of one of the world’s true global cities, our interdisciplinary approach provides us with a unique view across the past, present and future.

World societies and economies are transforming. It’s our job to understand that change, and to make a positive contribution to human welfare, new security challenges, social cohesion, sustainability and climate change. As one of the largest UK university social science faculties, we are committed to advancing research and education to help tackle some of the most important social, political and ethical issues of our time.

kcl.ac.uk/sspp
King’s International Foundation Programmes are designed and taught by King’s experts. Our pathways are developed and delivered by specialists within King’s faculties and King’s Foundations, offering clear progression on to a King’s undergraduate degree.

**KING’S FOUNDATIONS**

‘The Foundation year fully prepared me for my undergraduate studies. The well-organised modules, supportive tutors, and world-class facilities helped me gain valuable insights and hone the necessary skills to progress to the next level.’

Joey, King’s International Foundation (Mathematics & Physics Pathway) – progressed to Biomedical Engineering (MEng)

King’s International Foundation Programmes are designed and taught by King’s experts. Our pathways are developed and delivered by specialists within King’s faculties and King’s Foundations, offering clear progression on to a King’s undergraduate degree.

**KING’S INTERNATIONAL FOUNDATION**

The programme is designed to prepare the brightest international and EU students who have completed a Grade 12, or equivalent, high school diploma for a UK university education. Our students are King’s students from day one and, alongside your academic studies, you will also be able to access all of King’s facilities, from our libraries, IT, gyms and restaurants to the King’s College London Students’ Union (KCLSU) and its student societies, activities and clubs.

Incoming Foundation students are eligible to apply for the Scholars of Tomorrow Scholarship.

**PROGRESSION TO KING’S**

Our students progress on to a range of King’s undergraduate degrees including:

- Accounting & Finance BSc
- Biomedical Engineering MEng
- Computer Science BSc
- Business Management BSc
- Digital Culture BA
- Global Health & Social Medicine BA/BSc
- International Relations BA
- Law LLB**
- Political Economy BA/BSc

Biomedical and life sciences operate at the frontier of human knowledge, pioneering new technologies or new applications to understand, model, treat or prevent conditions that limit or inhibit life.

Studying biomedical and life sciences at King’s will put you at the heart of one of the leading centres of bioscience in the UK and give you the flexibility to explore your interests as they develop.

**COMMON YEAR ONE (CYO)**

Most of our biomedical courses share a common first year († refer to course information) which means you will be able to enjoy the flexibility to choose your degree after your first year, with our Common Year One curriculum. All Biomedical Science disciplines are covered in the first year, making the decision for your future an informed one.

---

**BIOMEDICAL & LIFE SCIENCES**

‘To be taught by lecturers involved in world-leading research is a huge benefit of studying at King’s. The broad range of topics has allowed me to choose which area I am truly passionate about.’

*Sara,* Biomedical Science BSc

---

‘The reason our Biomedical Sciences BSc is so popular is because it’s so flexible.’

*Dr Alison Snape*

‘I see chemistry as the perfect balance between all scientific disciplines, and that is highly evident at King’s. In the Chemistry Department we are taught by academics who are experts in their respective fields, conducting world-leading research, in state-of-the-art facilities.’

Samer, Chemistry BSc

Chemistry is known as the central science, because it lies at the interface of the physical and life sciences, connecting both, and is important to a variety of different fields. By studying chemistry you’ll understand the laws that govern the behaviour of atoms and molecules, their interactions and reactions, and in turn, the world around us.

Our courses will provide you with a comprehensive theoretical and practical understanding of chemistry, and prepare you for a professional life in the ever-changing environment of the 21st century. To achieve these goals, our courses integrate the teaching of chemistry foundations with the application of chemistry principles and techniques using examples taken from the very broad range of chemical and biomedical research and practice at King’s. Our ambition is to produce graduates who have a wider vision of the applications of chemistry for the coming decades, and who are equipped for more flexible careers.

From advanced robotics to internet-based technologies, computer science is transforming the way we live, and the shortage of appropriately qualified talent means that there has never been a better or more important time to further your skills.

Demand for talented graduates with advanced computing skills extends to almost every sector of business and government, from faster trading systems and settlement processes in finance to security systems and environmental science.

Our expertise covers a wide spectrum of computer science, including artificial intelligence, machine learning, cybersecurity, algorithms, data analysis, software engineering and human-computer interaction, and their application to health, security, urban living, finance and autonomous systems. This enables us to deliver a curriculum that gives our graduates the ability to work on the computer systems of today, and to create those of tomorrow.

COMPUTER SCIENCE

‘My course is all about solving different types of problems and facing new challenges. What I enjoy the most is the satisfaction I get when I have successfully completed my mission.’

Lucia, Computer Science MSci

King’s is home to the only academic department in the world to focus solely on the complexities of conflict and security. The Department of War Studies is world-recognised as a centre of excellence in the study of all aspects of war, conflict and international relations with a focus on war as a human phenomenon.

Combining international relations, security, history, military studies, psychology, philosophy and sociology, our courses offer a detailed and textured understanding of world affairs and the issues that lie behind news headlines – now and in the past. Our academics are experts and pioneers in their fields and are at the forefront of world events as they happen. As a part of King’s community, they are within the largest grouping of scholars in Europe that researches and teaches on world conflict, peace and security.

‘With the wide range of module choices and support from a dedicated academic team, war studies continues to broaden my perspective in considering the dynamics of war and has greatly expanded my academic interests and understanding of conflict.’

Dasol, War Studies BA

DENTISTRY

‘We are taught by world renowned academics whilst practicing in state-of-the-art facilities. The student-staff relationships and our reputation makes King’s the ultimate place to read dentistry.’

Balraj, Dentistry BDS

Dentistry is a demanding and hugely rewarding field of healthcare. Dentists, dental therapists and dental hygienists work to promote oral health and restore tooth function. From oral disease prevention strategies to fillings and crowns, or saving teeth after trauma, you’ll experience the intellectual challenges of diagnostics and the technical challenges of treatment.

Our courses combine the latest thinking in dental education with early clinical experience. You will be exposed to a rich breadth of skills and knowledge in a diverse clinical environment at Guy’s and King’s College hospitals, and on community placements.

The courses are designed to integrate with each other, offering students the opportunity of co-training. The benefits of inter-professional education complement the GDC’s expectations for the training of the future dental team.

Discover more about dentistry at King’s College London and watch our videos:

Clinical teaching in small groups allows staff to give personalised advice. Seeing patients is a great privilege – it’s the highlight of my week.’

Lauren, Dentistry BDS
‘I love my course because it challenges you to combine maths, physics, programming and hardware design to creatively solve problems.’

Zara, Electronic Engineering MEng

Engineering at King’s focuses on the synergies between fundamental engineering principles and leading-edge technologies in computing and telecommunications, robotics and biomedicine, enabling you to develop your expertise in the most influential topics of our time. King’s develops engineers for the 21st century.

We offer electronic engineering, biomedical engineering and general engineering. Our approach to teaching aims to be distinctive, combining both traditional teaching methods with modern, project-based learning, catering for the needs of our students and the industries in which they will work. Our ambition is to nurture graduates who are equipped to deal with real world challenges.

Our Biomedical Engineering Department is based in a UK Centre of Excellence for Medical Imaging in St Thomas’s Hospital.

All our courses benefit from close links with other disciplines.
Whilst in my lectures, I am told about the latest cutting-edge research which inspires and motivates me even more.

GEOGRAPHY & THE ENVIRONMENT

‘I can’t imagine a better place to study geography than King’s as it uses London as its classroom. We’re given opportunities to learn and explore the world and we’re taught by the very best in the field.’

Georgia, Geography BA

Studying geography at King’s enables you to examine some of the key issues facing the world today, including climate change, environmental degradation, global inequality, sustainability, and urban regeneration.

At undergraduate level, our geography degrees provide you with specialist knowledge and skills within a broad interdisciplinary education. Development, Environment & Society, Geocomputation & Spatial Analysis, Urban & Cultural or Physical Geography are thematic areas that you can concentrate on or combine.

In your first year you will have a field trip to Spain, followed by a choice of week-long international trips in your second year to destinations that currently include China, India, Morocco and the USA.

Above: Image taken by former geography student, Catherine, on her second year field trip to Kerala, India.

The study of history or classics is your opportunity to explore how the past has impacted our present. Shape your study around your interests with our wide range of options.

Whatever your passion – King’s has experts who share your enthusiasm.

Enjoy studying degrees which have unrivaled global reach – from the ancient Mediterranean or Middle East, to Britain under Margaret Thatcher or contemporary China or Iran.

You’ll benefit from our exciting and innovative teaching; from hands-on classes in museums and field trips guided by special podcasts, to first-hand encounters with historical documents in our extensive on-site archives.

Our degrees provide you with the perfect springboard for many careers, including in social and political change, government, NGOs, journalism or law.

**HISTORY & CLASSICS**

‘I love finding out about past events that helped to shape the present. Every module is like a piece of a puzzle that helps me to better understand the world we live in today.’

*Eleanor, History & International Relations BA*

‘I’ve been lucky enough to have one of my seminars in the British Museum itself! It’s really fun to have so many learning opportunities outside of a classroom environment.’

How has globalisation affected different parts of the world? What are the successes and development challenges for emerging economies? How are health and social problems in one country tackled in another?

International affairs and development combines elements of economics, geography, health, history, philosophy, politics and social science to explore the relationships between different countries and regions and the way their evolving stories shape international relations.

Our International Development course offers a distinctive approach to the study of development by focusing specifically on the middle-income countries (emerging economies) driving changes in the global economy. Our Geography and Global Health & Social Medicine courses tackle some of the major issues confronting society today.

Above: Image taken by former geography student Fahmina Begum, on her second year field trip to Hong Kong.

‘The multidisciplinary nature of international development helps me to understand why today’s developing nations will one day become centres of global wealth and infrastructure.’

Rohan, International Development BA

Studying one of our ancient or modern languages and literature degrees will boost your employability in our globalised world by enhancing your skills in communication and analysis.

Our modern language courses will equip you with the skills to become a culturally aware citizen. You’ll become fluent in another language and understand how societies are structured and governed.

On our English Language & Linguistics BA, you’ll explore language across society, media, arts, mind, and education, and discover how language shapes our lives.

If you love literature, our comparative literature courses explore writing spanning over 2,500 years, across six continents and 12 languages – all taught in English translation.

Explore literature, drama and creative writing on our English BA. You’ll combine historical perspectives and contemporary theory and discover connections with other art forms including through collaborative modules taught with our cultural partners.

‘My degree allows me to look into the meanings of language and art across different cultures and time periods. I’ve been able to explore world literature, from French poetry to Palestinian theatre.’

Sylvie, Comparative Literature BA

UNLOCK THE WORLD WITH MODERN LANGUAGES

Choose from our range of Modern language and European Studies options and unlock the world!
As well as achieving fluency in your chosen language(s), you’ll explore the culture and society of countries where those languages are spoken – with opportunities to cover everything from politics, literature and film, to history and cultural studies.

You can take up to a year abroad, where you’ll study with one of our prestigious partner universities or take an approved work placement. You’ll also have the chance to begin a language from scratch with our ab initio (for beginners) option on our joint honours Modern Languages BA and our European Studies BA.

On our Modern Languages BA, choose to study a single language (French, German, Spanish or Portuguese) or to combine two of these languages as a joint degree. You can also take on a further language taught in our Modern Language Centre – with options including Arabic, Mandarin, Japanese, Russian and more. We also offer combinations with English, History, Management and Philosophy.

MANAGEMENT, BUSINESS & FINANCE

‘My experience at King’s Business School has been fantastic so far. The course is challenging, varied and studying in London provides plenty of opportunities to build skills for my future career.’

Isabelle, Business Management BSc

Management, business and finance courses at King’s Business School explore modern business alongside organisational management theory and practice. You’ll discover cutting-edge ideas from finance, accounting, economics, social science, marketing and strategy. You’ll put your new knowledge to use, evaluating different economic and political systems.

You’ll study in the heart of London. This global hub for commerce and finance gives you unlimited opportunities for networking – and plenty of career options to explore.

‘King’s Business School puts you at the heart of a great global city, preparing you for the business challenges of the future.’

Professor Brian Bell, Professor of Economics
MATHEMATICS

‘From the outstanding lecturers and thought-provoking modules to the vibrant student culture, I couldn’t have chosen a better place to study.’

Tahmid, Mathematics with Management & Finance BSc

Mathematics has always played a central role in science and society and this is especially true in the modern world. Mathematics covers a huge spectrum of fascinating topics and addresses some truly fundamental questions that underlie our existence, the universe and both natural and man-made constructs within it.

Studying mathematics at King’s will place you in one of the leading centres of mathematical teaching and research, working with and learning from some of the foremost mathematical minds in the world.

Our courses offer a wide range of required and optional modules and you can also choose to combine mathematics with various other fields, including management and finance, statistics or philosophy.
Overall my decision to pick King’s was due to a number of factors ranging from the academic reputation to the opportunities provided by both the university and its location. As I near the end of my four year journey at King’s, I can definitely say I made the right decision.

Puja, Mathematics MSci
‘I feel privileged to have been taught by such inspiring teachers. King’s has prepared me to be a compassionate, caring, competent and safe doctor.’

Annabelle, Medicine graduate

Blending biomedical sciences, population sciences and clinical practice, our MBBS programme provides authentic clinical experiences to truly bring medicine to life.

King’s is one of the most highly respected teaching institutions for medicine, benefiting from partnerships with three prestigious London teaching hospitals – Guy’s, King’s College and St Thomas’.

King’s offers a number of different entry routes to medicine, including a fast-track graduate programme and an innovative programme aimed at broadening access to the medical profession.

NURSING & MIDWIFERY

‘As a King’s nurse, I get to train at world class hospitals rated outstanding by the Care Quality Commission. To care for young patients and to gain experience in the process is a great learning curve and achievement.’

Chloe, Children’s Nursing BSc

With nursing and midwifery at King’s, we can help you find your own career path. You can study adult nursing or pick a different specialism that suits your interests. Help people with mental health issues. Work with children or in the community. Deliver babies. Whatever area you want to explore, we’ll help you learn the skills to succeed.

Our tutors and lecturers are leaders in their fields. Their cutting-edge research feeds into your course to keep you up-to-date with the latest thinking. But studying at King’s is about much more than the teaching staff. From fully-equipped simulation suites to a host of student societies, you’ll have everything you need to make the most of your time here.

Our courses lead to registration, providing a firm foundation for your career as a healthcare professional.

Combining theoretical and practical learning, and based at some of the UK’s leading teaching hospitals, there simply isn’t a better place to begin your career in nursing or midwifery.

Developing, prescribing and administering drugs lies at the heart of modern healthcare and the prevention and treatment of disease.

Our pharmacy and pharmacology courses provide insight into every step of the drug delivery process – from drug design to understanding the effects of the drug on the body and clinical administration.

All of our courses are delivered within one of the most extensive medical and bioscience teaching communities in the UK, making King’s an ideal place to begin or advance a rewarding career.

PHARMACY & PHARMACOLOGY

‘King’s was my first choice when I applied to university because of its amazing reputation and, secondly, its diversity. Whatever we learn we put into practice – it’s clinical and theory hand in hand.’

Syeda, Pharmacy MPharm

Challenge and broaden your perspectives on cultures, religions and our place in the world, on one of our philosophy and religion courses.

You can explore how ideas of humanity and obligation can influence the society we live in, and examine the origins and impact of religious radicalism and modern spirituality.

Study in one of the largest and most distinguished Philosophy departments in the country. You’ll choose from modules covering all areas of contemporary philosophy and the history of philosophy without any gaps, including Islamic, Indian and Chinese Philosophy.

Take advantage of our expertise in Islam, Judaism, Christianity, Buddhism and a variety of contemporary religious movements in our vibrant Department of Theology & Religious Studies.

You’ll be able to make the most of London’s rich religious culture – with teaching that incorporates many places of worship, as well as the collections of the British Museum and the National Gallery.

PHILOSOPHY & RELIGION

‘Studying philosophy at King’s has made me think in a new way. The modules offered, along with the lecturers, stretch your thinking and provide you with the ability to view the world through different lenses.’

Phoebe, Philosophy BA

<sup>†</sup> Course also available with a year abroad (4 years total BSc, 5 years total MSci). Please check online for details.
SUBJECT AREAS:
PHILOSOPHY & RELIGION
‘Studying physics at King’s has allowed me to completely explore and question physical ideas and concepts in a department that is at the forefront of world-class research.’

Sigourney, Physics BSc

Physics has been studied and taught at King’s since its foundation in 1829, with many distinguished physicists working or studying here, including six Nobel Laureates. Most recently, Professor Sir Peter Higgs, an alumnus of King’s, was awarded the Nobel Prize for Physics for seminal work in predicting the existence of the Higgs Boson.

Today, our physicists continue to push boundaries. In conjunction with CERN, we are developing new electronic and optical materials for future technological applications and for renewable energy, as well as using physics to better understand biological structures and processes.

Research lies at the heart of our department, with all of our courses featuring modules taught by internationally renowned scientists. You can choose to study straight Physics and select from a broad range of modules, or combine Physics with Biophysics, Philosophy, Theoretical Physics or Astrophysics and Cosmology.
It is extremely inspiring that Maxwell and Higgs are a part of the history here at King's. The teaching here is fantastic.

Anna, Physics BSc

Vast financial, technological and health inequality means that societies and their leaders have to decide how to navigate the changes and challenges of the 21st century.

Our policy and society courses provide opportunities to explore diverse questions, conduct research and provide the insights that will help to steer governments, policy makers, NGOs and other bodies in determining how to confront some of the major issues affecting society – both in the UK and abroad.

Our Social Sciences BA and Global Health & Social Medicine BA and BSc offer unique and exciting training for a new generation of leaders passionate about social justice who want to make a difference in the world.

Deborah, Global Health & Social Medicine BSc

‘Growing up I’ve always had an interest in developing nations. Studying global health and social medicine at King’s enables me to explore what I can do to bring change and promote equality.’

Find out more about studying at King’s within social science and public policy courses:

Global health and social medicine is a course that inspires passion while actually giving you the tools to make and drive the social change you want to see.’

Katya, Global Health & Social Medicine BA

SOCIAL SCIENCES BA

Black Lives Matter, #MeToo, climate breakdown, resurgent nationalism, rising inequality, fake news... Questions about how we understand, structure and change society have never been more urgent. The Social Sciences BA is an innovative course for students who care about positive social change. It provides a rigorous, interdisciplinary grounding to theories and methodologies from across the social sciences, enabling students to engage with the issues that matter most to them. Our connections in the capital and internationally provide real-world learning opportunities for broader horizons and enhanced employability.

POLITICS & ECONOMICS

‘London is a city unlike any other. It is an incredible place which attracts decorated and experienced politicians and speakers, which really enhances the course and teaching here.’

Peter, European Politics BA

Drawing together a wide range of disciplines, our portfolio of courses in politics and economics offers an enormous range of modules that examine, in depth, the factors that shape regional and global decision making.

You will have the opportunity to explore broad themes and detailed analyses, focusing on issues confronting specific regions, and to select optional modules that reflect your own personal interests and ambitions.

Located in the centre of London, minutes away from both the Houses of Parliament and the Bank of England, we offer students the opportunity to interact with political, governmental and financial institutions across the city.

Psychology and neuroscience provide an opportunity to explain behaviour in all its forms: from understanding the brain to analysing complex social interactions.

The study of the human brain is one of the most exciting areas in modern science. We explore why people behave the way they do and investigate a wide range of mental and psychological health conditions.

Our students benefit from world-leading facilities, unrivalled opportunities for clinical and other placements, and are members of a diverse academic community at the forefront of ground-breaking research.

THERAPEUTIC HEALTH

‘Sport and exercise medical science is a new and relevant course in today’s society. The range of modules allow me to expand my interests and work towards my passion.’

Judi, Sport & Exercise Medical Sciences BSc

Therapeutic health professionals play a vital role in delivering healthcare, either by tackling conditions and challenges before they become critical, or by supporting recovery and rehabilitation following medical intervention.

Our nutrition & dietetics and physiotherapy courses, accredited by the relevant professional bodies, will enable you to confidently take your place on the front line of healthcare delivery.

King’s is one of the most highly respected teaching institutions in medicine, benefiting from partnerships with three prestigious and busy teaching hospitals in central and south London – Guy’s, King’s College and St Thomas’ hospitals.

‘The quality of the teaching is excellent and I love the variety of the physiotherapy course.’

Frederick, Physiotherapy BSc

PRE-UNIVERSITY SUMMER PROGRAMMES

‘My summer at King’s made it clear to me that I want to study here. I gained first-hand insights into the course and made life-long friendships with people from across the globe.’

Louise, Summer School

Our programmes combine lectures, seminars, excursions and wider skills sessions to offer you a genuine taste of undergraduate study and help you prepare for your future at university and beyond.

We offer summer programmes for students aged 15 and older on campus in London and at a number of locations across the world.

PRE-UNIVERSITY SUMMER PROGRAMMES
SUBJECT AREAS CAN INCLUDE:

- Arts & Humanities
- Business Management
- Law
- Politics
- Psychology
- The Human Body
- Science & Technology

Make the most of your summer and build your confidence ahead of university applications by attending one of our dynamic, academic pre-university summer programmes.
‘Thanks to the Pre-University course I am sure which degree to choose at undergraduate level.’

Ivana, Summer School

ENTRY REQUIREMENTS

With students from 150 different countries coming to King’s, our admissions staff are experienced in supporting home and international applicants and assessing a wide range of qualifications. In this section you will find information and advice about entry requirements, qualifications and how to apply.

USING THIS GUIDE
Please go to pages 22 to 77 to find the range of courses offered at King’s. For each listing, you will find A-level and International Baccalaureate (IB) entry requirements, English language requirements and study opportunities. You will also find the relevant UCAS code. This guide is designed to provide an overview of the courses King’s has on offer; however we would recommend doing further research using our online course pages.

kcl.ac.uk/ug

FINDING QUALIFICATION EQUIVALENCES
If your qualification isn’t shown next to the relevant course listing in this guide, please refer to the reference table on the right, which is intended to provide a general guide to grade equivalences for additional qualifications. There are many more equivalences also listed on the admissions webpages.

kcl.ac.uk/ug-international-erq

COMPULSORY AND PREFERRED SUBJECTS
Some of the courses we offer require you to have studied specific subjects to a certain level before starting your undergraduate studies. These are specified in the course entry requirements as compulsory subjects. Preferred subjects indicate that you may be at an advantage if you are studying the subject(s) and may make a smoother transition into the first year; however, it is not compulsory for admission. Full details of course requirements are available online.

kcl.ac.uk/ug

A-LEVELS
For the majority of our courses we would usually expect to see three subjects taken at A-level (excluding Critical Thinking, General Studies, Global Perspectives and Thinking Skills) in one sitting. Please check the course pages online before you apply.

TAKING EXAMINATIONS EARLY
While King’s encourages students to stretch themselves academically, students who are entered early for their examinations should have the potential to achieve the same grade as might be expected if they were entered in the standard year. Therefore, if you gain an A-level grade B in Year 12, this will not be considered as good as achieving a grade A in Year 13.

GCSE
Some of our courses also require students to have achieved a specific grade at GCSE level (or equivalent). These requirements are detailed online on our course pages. If you’re studying the 9-1 GCSEs in England or A*-G GCSEs in Northern Ireland, please check the website for up-to-date information.

kcl.ac.uk/ug

EXTENDED PROJECT
The Extended Project Qualification (EPQ) has the potential to develop many skills that may prove beneficial when studying at King’s but will not be considered in place of an A-level requirement.

</tbody>
</table>

**International Baccaulærate**

Our offers ask for an overall points based score out of 45 (which includes the core/bonus points) as well as specifying grades in three Higher Level (HL) subjects and occasionally in Standard Level (SL) subjects.

**Access to HE Diploma**

King’s welcomes applicants taking the QAA Access to HE Diploma to the majority of our courses. Please check our online prospectus carefully for the requirements for your chosen course. This is a popular choice for applicants returning to education after a break. To find Access to HE courses in your area visit:

acessotohe.ac.uk

**BTEC Level 3 Diplomas**

Some of our courses will consider applicants with the BTEC Level 3 Extended Diploma, or combinations of other BTEC Level 3 diplomas and other qualifications. Please check our online course pages for details for your chosen course, and contact the Admissions Office if you are unsure.

**Combination of Qualifications**

We understand that some applicants may offer a combination of qualifications taken at the same time; for example, A-levels and Cambridge Pre-U, or A-levels and BTECs at Level 3. Our Admissions Office is happy to advise you on the suitability of your combination.

**Re-sits**

The majority of our courses will consider applicants who are re-sitting their exams to achieve higher grades, but we advise checking the course pages online for any guidance or restrictions on re-sits for your chosen course. Please note that we consider taking the same subject again at the same level – even if through a different qualification – to be a re-sit.

**Extended/King’s International Foundation**

If your high-school leaving qualification is not quite suitable for direct entry to our undergraduate courses, you can take one of King’s International Foundation Programmes – refer to pages 22 to 23 for more information.

*For more information regarding specific entry requirements, please visit kcl.ac.uk/ug-international-erq*
We are delighted that you are considering applying to King’s and are keen to support you during your application. King’s seeks to admit the brightest and the best students with the potential to make the very most of our world-class facilities and academic staff.

This section provides you with more information as to how your application will be considered. Our admissions webpages have detailed step-by-step guidance and FAQs to help you through the application process and there is further information for applicants, parents, carers and teachers online.

**HOW TO APPLY TO KING’S**

You should apply for an undergraduate degree course at King’s through UCAS. UCAS applicants can apply independently of a school or college, but where possible it can be useful to apply through a school or college. Please visit the UCAS website for further information.

ucas.com

If you are considering applying for study abroad or for one of the King’s International Foundation programmes, please check online for application guidance.

kcl.ac.uk/ug

For postgraduate courses (except nursing postgraduate qualifications leading to registration) please check the relevant course pages online.

kcl.ac.uk/pg

**KING’S ONLINE PORTAL**

We have an online portal called King’s Apply for all students applying to our undergraduate courses. This allows you to:

- track the status of your application
- see if you’ve been invited to interview (where relevant)
- view the details of your offer
- view information specific to international student needs, such as information on visas.

Once you have submitted your application through UCAS we will email your username so you can access King’s Apply to track your application. King’s Apply also has a messaging function: this is how we will communicate with you regarding your application status and to invite you to any on-campus events, so please ensure you use your login regularly to keep up to date.

apply.kcl.ac.uk

**DEFERRED ENTRY/GAP YEAR**

If you would like to take a year to gain some experience, earn funds in preparation for your studies or generally broaden your interests, we’re happy to consider your application for deferred entry. We suggest that you apply in the final year of your secondary or further education, indicating in your application that you will be deferring entry and outlining your general plans in your personal statement. You are also welcome to apply to King’s towards the beginning of your gap year after completing your qualifications.
ADMISSIONS CRITERIA

Our Admissions Office considers all aspects of your application, including examination grades, predicted grades, your personal statement and the reference. All applicants are required to disclose any relevant unspent criminal convictions in their application. Some of our courses also require additional checks through the Disclosure and Barring Service (DBS) or occupational health checks. Additionally, relevant work or voluntary experience is preferred for some of our courses; please ensure you mention this in your personal statement if relevant. It’s important to check our online course pages for full entry requirements and specific application guidance for your course before you apply.

CONTEXTUAL DATA

King’s may also consider the educational context of an applicant’s formal achievement, as well as other indicators of potential and capability. Further information regarding our use of contextual data can be found on the website.

INTERVIEW

Many of our healthcare courses, such as Medicine, Dentistry, Nursing and Midwifery, require you to attend an interview as part of the application process. These will be in the multiple mini interview (MMI) format and you will receive further information about what to expect if you are invited to an interview. We may also interview applicants on other courses in order to assess qualities that can’t be seen from your application alone, or perhaps when a student is presenting non-traditional qualifications.

If you are invited to an interview, you will be given details of what to expect and the format of the interview when invited.

APTITUDE TESTS

The majority of the courses listed below have compulsory aptitude tests that we require as part of our selection process. Please check this information carefully before you apply and make sure that you take the test before the required deadline.

<table>

‘There’s no need to list everything you’ve done in your personal statement. The best applications focus and reflect on interests, qualities and activities that are most relevant to the course you’re applying to.’

Schools Liaison Team
King’s College London

kcl.ac.uk/ug

Undergraduate Guide 2021 • For up-to-date course details, please visit kcl.ac.uk/ug
At King’s we’re committed to admitting the best and brightest minds regardless of background. We want to ensure that the student body at King’s College London reflects the diversity represented in wider society.

**WIDENING PARTICIPATION**

Students from under-represented backgrounds are supported to gain access to higher education through our free widening participation schemes. We run a variety of schemes including our two-year programme K+, Realising Opportunities and Sutton Trust Summer Schools. You can read more about the work of the Widening Participation Department online.

kcl.ac.uk/wp

**MATURE APPLICANTS**

Applicants with relevant work/life experience must also apply through UCAS. Your application will be considered on its own merits, and relevant experience may be considered alongside or in place of formal qualifications where suitable. Please note that many courses do require previous study and demonstrable high attainment in certain subject areas. We recommend that you contact the Admissions Office before applying, with details of your academic background and appropriate experience.

If you are a mature student looking to take further qualifications with a view to applying in the future, you may want to consider Access to HE diplomas (where suitable); alternatively, you can seek advice from the Admissions Office, or see the website.

kcl.ac.uk/study/widening-participation/mature-students

**DISABLED STUDENTS**

If you have a disability, long-term medical or mental health condition and/or a specific learning difficulty such as dyslexia, we encourage you to disclose this in your UCAS application. We can then provide you with additional information and support. If your course requires an interview, the information that you provide can help us to ensure that we make suitable arrangements.

kcl.ac.uk/disability

**CARE LEAVERS**

We strongly advise all care-experienced applicants to disclose this on their UCAS application form. This will allow admissions staff to take your circumstances into consideration and will not have a negative impact on your application. King’s College London has a significant system of support for care-experienced students, including bursaries and accommodation. We understand the difficulties students from a care background face and provide financial, academic and personal support to ensure these students achieve and succeed.

kcl.ac.uk/care-experienced

‘The Widening Participation Department have helped us as parents immensely. My daughter was the first in our family to go to university and we did not have a clue about the support that is out there. King’s staff took the time to explain all of this, which was a huge help.’

Dilly, mother of a student applicant

‘As I approach my fourth year of medical school, it still feels surreal to think of how far I have come. It wouldn’t have been possible without the immense support I have received from King’s and my determination to succeed.’

Michelle, care-leaver student
ESTRANGED/INDEPENDENT STUDENTS

If you are under 25 and studying without the support of your family, and are not in contact with them, you may qualify for the same support package as care-experienced students. We strongly encourage you to let us know so we can support you with your application and transition to King’s College London.

kcl.ac.uk/estranged

FORCED MIGRANTS

Currently, we offer eight Sanctuary Scholarships per year for students who cannot access student finance as a consequence of their immigration status. These scholarships cover the costs of tuition fees as well as providing a grant equal to the maximum student loan each year. Whilst we expect this scheme to continue annually, please check the website for up-to-date information before you apply.

kcl.ac.uk/forced-migrants
FEES & FUNDING
HOME/EU

On the following pages you will find information on fees and funding options for students who are eligible for home/EU fee status. Our range of financial support is designed to help you achieve your potential, whatever your financial circumstances.

‘When you apply, search for scholarships and bursaries on the website. These can help fund your tuition fees and your time at uni. You’ll be surprised how many there are.’

Freddie, Higher Education Liaison Officer

TUITION FEES

Tuition fees may increase annually to take into account changes to the form and content of the course and the cost of inflation. Please check our fees and funding web pages for the most up-to-date tuition fees for all courses.

kcl.ac.uk/study/undergraduate/fees-and-funding/tuition-fees

IMPORTANT INFORMATION FOR STUDENTS FROM THE EUROPEAN UNION

In May 2019, the UK government confirmed that EU students starting their studies in English universities in 2020 will pay the same fees as UK students. Funding arrangements after 2020 have not yet been confirmed, but King’s is fully committed to being an international university and EU students are vital to our community.

gov.uk/government/news/eu-student-funding-continued-for-202021

EXPECTED LIVING COSTS IN LONDON

We would recommend budgeting for living costs in London to be £1,265 per month, excluding your tuition fees. The website www.gov.uk also recommends students have £1,265 a month to cover living expenses. These figures are only intended as a guide and how much you need will depend upon your lifestyle.

Please also allow for annual inflationary increases as part of your budget planning and remember to consider your initial arrival costs. These could include accommodation deposits, household items, clothing, etc. For more information, please visit:

gov.uk
kcl.ac.uk/advice

ADDITIONAL COSTS

In addition to your course fees you may incur other costs, for example for field trips, equipment, materials, bench fees or studio hire. This will vary by course and so we provide information about these costs on the relevant course pages on our website. Please make sure you check these course pages before you apply.

kcl.ac.uk/ug

You only start to repay your student loan after you have left university and earn over £25K
FUNDING

STUDENT LOANS
Currently, for home and EU students, all first-degree tuition can be paid for by a tuition fee loan. In addition, most home undergraduate, first degree students will be eligible for a maintenance loan to subsidise living expenses. Please note:

• Repayments are nine per cent of income above £25,000 and come out of your salary pre-tax.
• Your student loan does not affect your credit rating and all outstanding balances will be written off after 30 years.

For up-to-date information on eligibility and entitlement, please visit the Student Finance zone within the Student Room website.

bit.ly/student-finance-zone

IMPORTANT INFORMATION FOR STUDENTS FROM THE EUROPEAN UNION
In May 2019, the UK government confirmed that EU students applying to start courses in the 2020/21 academic year will remain eligible for undergraduate financial support from Student Finance England for the duration of their course, provided they meet the existing residency requirements.

gov.uk/government/news/eu-student-funding-continued-for-202021

NHS FUNDING
Currently, NHS funding is offered for the fifth year of study onwards of five and six-year dentistry and medicine courses, and also for the second year of study onwards for graduate-entry courses. Subject to government review, this may change for new entrants in 2020–21. For more information and up-to-date figures, please visit the NHS website or visit our fees and funding web pages.

nhsbsa.nhs.uk/nhs-bursary-students
kcl.ac.uk/funding

NURSING & ALLIED HEALTH BURSARY
The government have announced that from September 2020, Nursing, Midwifery and some allied health students will received a yearly bursary of at least £5,000. We expect the government to release further information about the bursaries, including details of the eligibility criteria, prior to September 2020.

gov.uk/government/news/nursing-students-to-receive-5-000-payment-a-year

SCHOLARSHIPS AND BURSARIES
King’s offers a number of scholarships and bursaries designed to help you achieve your potential, whatever your financial situation. Search our scholarship and bursaries database online to find funding opportunities available to you for your chosen subject area:

kcl.ac.uk/ug-scholarships

FURTHER HELP
King’s Student Funding Office provide information and guidance on how to apply for UK funding, as well as scholarships, bursaries and other financial help. If you have concerns about your eligibility for funding or need help proving your personal circumstances, the Money Advisors in Student Support & Wellbeing can assist you:

kcl.ac.uk/studentservices

For further information, please contact the student funding office:
kcl.ac.uk/funding
funding@kcl.ac.uk
+44 (0)20 7848 4204

Find out more about how to apply for student finance:
gov.uk/student-finance
FEES & FUNDING
OVERSEAS

We understand that coming to the UK as an overseas student is a big financial commitment and, before you start your degree at King’s, we want to ensure you have fully considered your finances.

HOW MUCH DOES IT COST?
Tuition fees rise annually to take into account changes to the form and content of the course and the cost of inflation. Please check our fees and funding web pages for the most up-to-date information for all courses.

kcl.ac.uk/study/undergraduate/fees-and-funding/tuition-fees

TIER 4 VISA RULES
To apply for a Tier 4 student visa, international students must demonstrate they hold cash funds to cover both living costs and tuition fees.

MAINTENANCE FUND REQUIREMENT
Living costs to meet Tier 4 visa requirements are £1,265 per month of study up to a maximum of nine months, this amount is in addition to any tuition fees remaining for the first academic year. These figures are set by the government and are subject to change. Please check the UKVI website to confirm the requirements for your course before you apply.

For more information, please visit www.gov.uk and search for ‘Tier 4 visa rules’ or visit our web pages.

kcl.ac.uk/tier4

LIVING COSTS
As a minimum you should have access to the amount of living costs required for your visa. Living costs in London will vary depending on your personal circumstances and lifestyle. The Advice & Guidance Team can provide further information and guidance.

kcl.ac.uk/moneydoctors

‘London is not too expensive for a student. Many restaurants, shops and events have student discounts, and King’s even offer financial advice to help you budget your money. There are also possibilities for earning money on the side with a part-time job, which I for example have as a student ambassador for King’s.’

Andrea, International Relations BA, Norway
ADDITIONAL COSTS
In addition to your course fees and living costs you may incur other costs, such as for field trips, equipment, materials, bench fees or studio hire. This will vary by course and so we provide information about these costs on the relevant course pages on our website. Please make sure you check these course pages before you apply.
kcl.ac.uk/ug

INTERNATIONAL STUDENT DEPOSIT
Once you have received an offer of a place at King’s, you will be asked to pay a non-refundable deposit to secure it. This will be a part payment towards your first-year tuition fees. Further information is available on our website.
kcl.ac.uk/undergraduate/apply

STUDENT FUNDING OFFICE
King’s Student Funding Office provide information and guidance on tuition fees, bursaries, scholarships and other financial assistance at King’s. Please contact our staff if you need any help or guidance.
kcl.ac.uk/funding
kcl.ac.uk/study/undergraduate/fees-and-funding/contact-us

FINANCIAL SUPPORT
SCHOLARSHIPS AND BURSARIES
King’s offers a number of scholarships and bursaries for overseas students. Search our web pages to find funding opportunities available to you:
kcl.ac.uk/ug-scholarships

LOANS FOR US STUDENTS
US Federal Student Aid will be available for most US students. We would recommend checking our United States Student Loans pages for guidance about how to fund your studies using Federal Student Aid.
kcl.ac.uk/study/postgraduate/fees-and-funding/student-funding/postgraduate-taught-funding/united-states-student-loans

£1,265
is the minimum amount for monthly living costs outside of tuition that we advise all EU and overseas students to budget for
In accordance with Tier 4 visa regulations.

INTERNATIONAL STUDENTS

King’s welcomes more than 11,000 international students each year from over 150 countries across the globe. Our dedicated web pages for international students explain everything you need to know about applying and studying at King’s, and living in London.

VISIT OUR INTERNATIONAL WEB PAGES FOR DETAILS ABOUT:

- dates when King’s may be visiting your country
- advice on visa and immigration matters, working in the UK and other key issues
- accommodation
- international careers fairs and employment
- academic preparation courses
- fees, funding and international scholarships.

ENGLISH LANGUAGE REQUIREMENTS

To succeed on our courses successfully and fulfil student visa requirements (where applicable) you must have a good command of English and be able to apply this effectively in an academic environment. International students are usually required to provide certified proof of competence in all four English language skills (speaking, listening, writing and reading) before starting their studies. If we decide to make you an offer to study, one of the conditions of this offer will be to meet our English language requirements by a specific deadline.

Check the table below for English language requirements for each band. The band required for each course is labelled as ‘ELR’ in the course tables on pages 22 to 75.

<table>
<thead>
<tr>

While studying at King’s you will have the choice of living in King’s Residences (which includes those managed by Unite and Fresh), University of London Intercollegiate Halls, or their University Home scheme. You can also choose to live at home or in the private rented sector.

We guarantee accommodation for all first-year undergraduates as long as you meet our application criteria by the application deadline, which is published on our website annually. You will be eligible to apply for accommodation once you have been offered a place on an undergraduate course at King’s and you have firmly accepted your academic offer. Accommodation is also allocated to study abroad applicants who submit their application and meet the relevant criteria. For more details on our accommodation and the application and allocation processes, please visit our accommodation webpages.

**ACCOMMODATION OPTIONS**

The majority of our accommodation options are in central London, close to King’s teaching campuses, and are within London travel zones 1 and 2. Details on our accommodation options are available online, where you will also find images and information on each residence’s facilities, fees and how to book a viewing.

**KING’S RESIDENCES**

All of our residences are non-smoking and have a dedicated residence team that includes day and night reception and live-in residence associates and wardens. All utilities, including Wi-Fi, are included in the weekly rent and you can use laundry facilities at an additional cost.

**UNIVERSITY OF LONDON INTERCOLLEGIATE HALLS**

There are a number of rooms available for King’s students within the University of London Intercollegiate Halls, which provide an opportunity to meet and live with students from other London institutions. These halls are owned and managed by the University of London.

**PRIVATE RENTED SECTOR**

London offers an enormous and varied range of private properties to rent. King’s has a dedicated student housing advisor for accommodation, budgeting and tenancies, and you can also use the University of London Housing Services (ULHS), which specialises in helping students find private accommodation. Lists of vacant properties are available online, as well as on the ULHS flat share noticeboard.

**PRIVATE STUDENT ACCOMMODATION**

Private student accommodation halls are managed by accommodation providers with facilities similar to those offered at King’s. You can obtain more information directly from the provider and find tips and advice through Student Services Online.

**SPECIFIC HOUSING REQUIREMENTS**

If you have specific housing requirements, please contact our residences team as early as possible to discuss these needs. You will be asked to complete a medical self-assessment/personal statement form in liaison with your GP/specialist or relevant support.

‘My residence had all the essentials I needed; free WiFi, an on-site laundry room and communal areas to hang out with friends – I loved living here.’

Katie, Psychology BSc
STUDENT SUPPORT & WELLBEING

Studying at university brings a wealth of opportunities and challenges. Alongside your studies, you’ll be managing day-to-day life, which may include money, working, settling into a new city or country, relationships, friendships and new responsibilities. As a student at King’s, we want you to get the most out of everything that life here has to offer.

STUDENT SERVICES
Our range of student services offer practical and professional advice and guidance to support you before, during and after your time at King’s. The services complement the support provided within your academic faculty.

Below is a sample of the areas that we offer support in:
- applying to King’s
- course administration and assessments
- counselling and mental health
- disability
- fees, funding and money
- graduation
- housing and accommodation
- international student support
- settling in to student life
- starting at King’s.

STUDENT SERVICES ONLINE
Our innovative enquiry service makes it easy for you to find answers to common questions about student life and to access support services generally.

If you can’t find the information you need, you can contact us for support directly on the platform. Once you’re a King’s student with login credentials, you’ll also be able to use enhanced features.

self-service.kcl.ac.uk

HEALTH CENTRE
King’s has a comprehensive NHS student health centre at the Strand Campus. It is strongly recommended that all students register with an NHS GP on arrival in London. Our dedicated team is here to treat minor ailments as well as providing specialist management of long-term conditions, issuing repeat prescriptions and clinics covering a wide range of healthcare issues.

‘I always find student services so helpful! I have been blown away by how professional all of the staff are, and how keen they are to help and resolve any issues as quickly as possible. They always know what to do!’

King’s student
ADDITIONAL SUPPORT

ENGLISH SUPPORT AND STUDY SKILLS

King’s Foundations offers support to native English speakers or those with near-native proficiency who want more academic skills training, such as in using sources effectively, presentation skills and writing critically.

kcl.ac.uk/foundations

CHAPLAINCY

The Dean’s Office and Chaplaincy are part of the pastoral provision and are available to students of all beliefs and backgrounds. King’s has chapels and quiet rooms that are open to everyone for private prayer and reflection. Male and female Muslim prayer rooms are available on all campuses. A full-time Anglican Chaplain heads the Chaplaincy, which also includes Roman Catholic, Orthodox and Free Church Chaplains, and two part-time Muslim Chaplains. The Rabbi to Jewish students in London works as an associate of the Chaplaincy.

kcl.ac.uk/chaplaincy

KCLSU ADVICE

KCLSU Advice is independent from the university and therefore offers impartial, confidential advice relating to your rights and responsibilities as a student.

kclsu.org/advice

@kclstudent
EXPERIENCE KING’S FOR YOURSELF

This guide should help answer some of your questions about what King’s has to offer, but we know that this is only the start of the research you will want to do. King’s offers a number of other ways that you can find out more.

COME TO AN OPEN DAY
Get an insight into what it’s like to study at King’s at an open day. Meet current and other prospective students, school liaison officers, and attend a variety of sample lectures and tours.

STRAND CAMPUS: ARTS AND SCIENCES SUBJECTS
Saturday 27 June 2020
Saturday 5 September 2020

GUY’S CAMPUS: HEALTH SCIENCE SUBJECTS
Saturday 13 June 2020
Saturday 11 July 2020

For more details and to register, visit:
kcl.ac.uk/openday

ATTEND A TASTER DAY
If you are a Year 12 or Year 13 student, our taster days are a great way to experience life at King’s. Taster days offer you an insight into the subject area you want to study at university, but aren’t sure about at this stage.

Explore taster days at King’s.
kcl.ac.uk/tasterdays

GO ON A CAMPUS TOUR
If you can’t attend an open day or one of our taster sessions, King’s also organises campus tours every week. For further information, and to book onto a tour, visit:
kcl.ac.uk/campus-tours

NOT IN THE UK? NOT A PROBLEM!
Discover when King’s is visiting your country, get advice on visas and country-specific information:
kcl.ac.uk/international

CHAT ONLINE WITH OUR STUDENTS & KING’S STAFF
We understand travelling to London and visiting our campuses to attend an event isn’t always possible, but we still want to give you an opportunity to experience King’s. As an alternative to campus events, we host online events and live chats.

ONLINE EVENTS
Our online events are a chance for you to learn all about life at King’s. We cover a broad range of topics from webinars delivered by King’s academics, to live chats with students and staff from all over the university including Fees & Funding, Admissions, Residences and more.

UNIBUDDY
Unibuddy is an online platform that allows you to chat live with our students or send them a message and they will typically respond within 48 hours. You’ll receive a notification once they reply and you can even get updates through WhatsApp.

The search feature makes it easy to find students by course and read their blogs to learn about their experiences as students at King’s.

Sign up to Unibuddy online via our webpages to chat to King’s students.
kcl.ac.uk/unibuddy

IMPORTANT INFORMATION

DIVERSITY AND INCLUSION

KEY PRINCIPLES

King’s College London is a thriving and diverse community of over 31,000 students, completing a wide variety of courses from study abroad, through undergraduate and postgraduate degrees and including executive education courses.

The university is committed to the recruitment of students based solely on academic ability and potential, irrespective of social, cultural or economic background. All applications are considered on their individual merits and treated in a fair and equal way, utilising a holistic approach, based on all information provided to the university through the application process.

King’s College London is committed to embedding diversity and inclusion into all of its activities to ensure that the university becomes a richer and more diverse place to work and study. The Diversity and Inclusion Team promote best practice in diversity and inclusion, to enable all staff and students to achieve excellence. The team does this through developing initiatives to support staff and students from particular groups to succeed; the provision of training; reviewing and developing policies and practices that promote equality of opportunity and undertaking steps to ensure the university is compliant with the Equality Act 2010. Please contact us for more information about diversity and inclusion at King’s.

diversity@kcl.ac.uk

CHANGES TO COURSES AND GUIDE INFORMATION

The following message contains some very important information. Please read it before you use this guide. This guide was printed in the spring of 2020. It contains information on the courses that King’s College London (‘King’s’) intends to run for students who are planning to start university in the autumn of 2021. King’s has made every effort to ensure that the information provided is both helpful and accurate as at the date of publication. However, some changes, for example to courses, facilities or fees may become necessary due to legitimate staffing, financial, regulatory and academic reasons.

King’s will endeavour at all times to keep any changes to a minimum and to keep students informed appropriately.

For this reason, it is particularly important that you should check the website for updates or contact King’s using the contact details contained within this document.

kcl.ac.uk/study

NO LIABILITY TO PARENTS, SPONSORS OR OTHER THIRD PARTIES

King’s dealings and contracts with students and prospective students do not create a contract or other legally binding relationship between King’s and anyone else, for example parents, guardians or sponsors.

DEGREE AWARDING POWERS

In July 2006 the Privy Council granted King’s degree-awarding powers in its own right. King’s exercises these powers whilst remaining a constituent College of the University of London. Therefore, all students who start a course in 2020 will study for a King’s College London degree. Your degree certificate will record that your degree is awarded by King’s and that King’s is a member of the University of London. The enactment of this change in awarding authority does not affect the degree course curricula, the teachers or the methods of teaching, the modes of assessment, or the high quality of the academic and associated support provision.

UNDERGRADUATE QUALIFICATIONS AT KING’S

- BA: Bachelor of Arts
- BDS: Bachelor of Dental Surgery
- BEng: Bachelor of Engineering
- BMus: Bachelor of Music
- BSc and MSci: Bachelor of Science and Integrated Master of Science
- FdA: Foundation Degree
- LLB: Bachelor of Laws
- MBBS: Bachelor of Medicine and Bachelor of Surgery
- MEng: Master of Engineering
- MPharm: Master of Pharmacy
- DipHE: Diploma of Higher Education.

TERM DATES

Provisional term dates are listed on our website, we suggest you bookmark this webpage to revisit later in the year for any changes:

kcl.ac.uk/aboutkings/academic-calendar

WELCOME WEEK

20 to 24 September 2021
This guide is available in alternative formats. Please contact the marketing department for more information: marketing@kcl.ac.uk
King’s is ranked one of the top 10 universities in Europe* and based in the heart of London. With nine faculties, institutes and schools of study and five Medical Research Council centres, King’s offers world-class teaching and research.

Our extensive range of subjects include the arts, business, humanities, law, the sciences (including a wide range of health areas such as psychology, medicine, nursing, midwifery and dentistry) and social sciences including international affairs.
