2nd Student Research Symposium

10-11 am, December 3rd 2014

Harris Lecture Theatre, Guy’s Campus

Students will present work from their Research Projects and discuss ways of finding lab experience opportunities!

Jaana Tuominen

Is a 4th Year Student from Helsinki on the Extramural Year in Molecular Genetics. Jaana did her EMY at the Eliza Hall Institute of Medical Research in Melbourne - “Evaluating minor class splicing as a therapeutic target for major cancer”.

Jake Stoddart

Third Year Anatomy, Developmental and Human Biology Student. Jake will be presenting his summer studentship research in Dr. Giovanna Lalli’s lab in the Wolfson CARD, which was funded by the British Society for Cell Biology, investigating the role of drebrin in neuroblast morphology, and migration from the subventricular zone to the olfactory bulb.

John Manion

Third-Year Neuroscience Student – Info to be provided on the day!

Georgia Smith

3rd-year Biomedical Science Student with a focus on Immunology - and a Peer-Assisted Learning Leader (PAL)
